Neighborhood Sunshine Sisters held a "pet peeve" meeting in the Neighborhood Church last Wednesday afternoon. After a devotional period and reports of the sick among them, the ladies named and discussed their pet peeves. Many laughs resulted, but no one had her feelings hurt. Most pet peeves seemed to have their origin in indiscreet use of the telephone.

Mrs. Barry Reddy served cake and tea to the group.

The next Sunshine meeting will be held in the Neighborhood Church at 2 p.m. Wednesday, November 9. "Penny Pinchers" will be the topic. Ladies are requested to bring with them their favorite penny-pinching ideas.

A large group, some from out of town, were in attendance at a toy party at the home of Mrs. David Amerman on Farmington Avenue Monday evening. October 24. Delicious refreshments were served.

A "glider party" in Miss Willet's room in Pierson School recently proved highly enjoyable. In honor of the occasion of the casting being removed from Pat Reddy's arm, which was broken Sunday, Mrs. Reddy presented each child in his classroom with a small toy glider.

Since there was no school on Thursday and Friday because of a teachers' conference, the customary Halloween parties were held in Pierson School on Thursday.

Boys and girls say it was a lot of fun.

Mrs. and Mrs. Frank Posner and their daughter, Mrs. Ann, and their two sons were guests last week end of Mr. and Mrs. Don Bandelow in Willsborough, near Cleveland, Ohio. Mrs. Bandelow is Donna, recently married daughter of the Posners. The Bandelows are now nicely established in their pretty home.

Mrs. Vera Cooley of Dearborn was a guest on Saturday, October 22, of her cousins, Mr. and Mrs. Louis Graham of Mayfield Avenue.

Mrs. and Mrs. Carl Rubley of Bronson, Michigan, were callers Saturday evening at the home of the Misses Lora and Freda Ault of Norfolk Avenue.

During the middle of this past week George Knipple of Farmington was a business visitor in Ingleswood, New Jersey.

Mrs. Robert Lang of Mayfield

EXPERTS PREDICTS
HUGE INCREASE IN
FOOD CONSUMPTION

People will be using much less hard wheat by 1975 but the consumption of Michigan's soft wheat will increase slightly. Taken as a whole, the consumption of wheat will stay fairly constant.

That's an estimate by Agricultural Economist James T. Bonnen of Michigan State University. Results of his research provide guises, estimates of demand for many Michigan products for the coming years.

Bonnen bases his estimates on present trends and an analysis of the causes of consumption changes in the past.

He says these trends indicate an increase in U. S. population to 221 million by 1975, a labor force of 91 million people, an average work week of 35 hours, a 64 per cent increase in labor productivity, a doubling of the national output of all goods and services and a 50 per cent increase in disposable income.

That means, he indicates, that the total production and consumption of food will probably increase as much as 45 per cent. Other estimates on the consumption of farm commodities:

• Should increase at about the same rate as population. With the increase expected in production per cow, milk cow numbers will probably be upped only seven per cent.

• Beef - Total consumption of beef and veal should increase by 45 per cent. That means a boost in per capita consumption by 73 per cent. There will be an increase of ten per cent in beef output, per pound of feed input.

• Pork - Should increase by 35 per cent without any boost in per capita consumption expected. With constantly improved breeding, average litters will increase by almost two pigs and pork output per pound of feed fed will increase up to 20 per cent.

• Non-citrus fruit (apples, pears, peaches, etc.) - Total consumption should increase by only ten per cent. That's the result of an 18 per cent decline in per capita consumption.

At the same time the farm population is expected to decline by 32 per cent - 22 million to 15 million; the farm labor force to be reduced by 30 per cent.

Production per person on farms will at least double while the total agricultural output should increase by 45 per cent, Bonnen says.

Clarenceville High

C.H.S. Students
Attend State Meet

The Eleventh Annual Michigan Conference of Student Councils was held October 25 at the University of Michigan in Ann Arbor.

Mr. Young, assistant faculty advisor of the Clarenceville Student Council, and three members of the Council, Bob Bares, Delores Campbell and Jerry Veder, attended.

A general assembly in the morning with a panel discussion on problems in Student Council work began the day's activities. A meeting of discussion groups followed with Clarenceville's representatives attending three discussion sessions: "Improving Student Council Meetings," "Improving Student Council and School Morale," and "Financing the Student Council." A faculty advisor discussion group was held in the afternoon. They discussed student government in study halls, a challenge to the Student Councils.

After a luncheon the morning discussion groups continued, and later in the afternoon a joint faculty and student discussion group was held.

Garden Club Fetes
'Clean Water' Talk

"Clean Water" will be the subject to be discussed by Mr. F. B. Frost, a sanitary engineer, at an open meeting of the Farmington Garden Club to be held at 2 p.m. Monday, November 7, at the Farmington Baptist Church Hall.

Mr. Frost is a staff member of the Water Resources Commission for the State of Michigan and supervisor in charge of field survey and investigation in the south Metropolitan District. Following Mr. Frost's talk there will be a question and discussion period.

Mr. James Robertson, president of the Farmington Garden Club, extends an invitation to all persons interested in the subject to attend the meeting.

Preceding the open meeting, a regular meeting of the club will be held for members and their special guests starting at 1 p.m. Chairman of hostesses for the meeting is George Nahall, Jr., who will be assisted by Mrs. Walter Coon, Mrs. David Frings, Mrs. Edgar F. Manfield, Mrs. Herbert R. Neal, Mrs. Howard J. Richards, Mrs. Paul Schreiber.

HEALTH EXPERT
WARNS AGAINST
REDUCING CLUBS

Although currently popular weight reducing clubs may be helpful for many people who need to take off excess pounds, the Michigan Department of Health warns against joining unsupervised clubs, "which may result in the very thing you are trying to avoid, nutritional deficiency."

According to Mrs. Alice Smith, chief of the health department's nutrition section, weight reducing clubs should be formed "only with medical guidance and supervision."

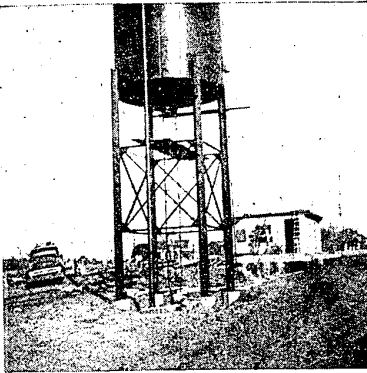

Nutritionists, Mrs. Smith explained, have become concerned about the popularity of clubs, which are established on an emotional, rather than a scientific basis, and "may result in harmful dieting."

"Usually, persons joining the unsupervised clubs don't stick to the deficient diets long enough to harm themselves," Mrs. Smith said. "They end up right where they started - and as a result of the discouraging experience, may throw caution to the winds and start obesity."

The health department nutrition specialist counseled the weight control - keeping within your right weight level - usually can be achieved through understanding and applying the rules of good nutrition, "often by adopting some new food habits which you can live with and be happy."

"But weight reduction," she urged, "is a medical matter, in which the doctor should play a leading role."

Not everyone who discharges his debts of gratitude can plume himself on being grateful.

CONSTRUCTION is now being completed on the sewage disposal plant which will serve the new Kendallwood Subdivision at Twelve Mile and Farmington Roads. The sewage disposal plant, set up for the development, will handle all sewage needs for residents in the subdivision. It has still not been determined whether the plant, located on the south side of Twelve Mile between Farmington Road and Power, will be supervised by utility.

Players Celebrate
Success Of Play

Following the final curtain of the Farmington Players' presentation of "Ramshackle Inn," members of the group and their friends celebrated with a buffet at the Nibble Nook Restaurant.

Lee O'Connor, director of the play, was presented with a pair of cuff links bearing the theatrical insignia. Martha Weber, his assistant, received a corsage.

A discussion was conducted on the one-act play, "When Shakespeare's Ladies Meet," under the direction of Pearl Briggs, which will be presented at the regular monthly meeting of the Players on November 19. Tentative plans for the group's Spring play were also made.

Since breakfast should provide from a fourth to a third of the day's food needs, children and adults who have little or no breakfast are likely to get too little protein and vitamin C.

MERCURY'S OCTOBER SALES
SMASH ALL-TIME RECORDS

Biggest October in Mercury history
starts the big move to THE BIG M

On September 29th THE BIG M—the new 1956 Mercury—was unveiled for the first time in dealers' showrooms. By November 1st, actual sales figures indicated immediate, overwhelming public acceptance far greater than in any previous first month following the introduction of a new Mercury model. It's still another new all-time record month for one of the fastest growing cars in automotive history. Come in now—see why so many people are making the move to THE BIG M.

CHECK THE BIG M'S
LEADERSHIP FEATURES!

- New 225-hp SAFETY-SURGE V-8 engines
- New high in usable power for pickup, passing, hill-climbing
- Ten big, new Safety-Engineered features
- Exciting, new Flo-Tone color styling
- 13 glamorous new models, including a whole fleet of low-silhouette hardtops
- New, wider price range
- Consistently higher resale value

From where I sit ... by Joe Marsh

Last Word in
Farm Machinery

Curly Lawson was first in this area to use one of those roadside vending machines. He's sold milk and eggs in one about a year now, and recommends them highly—but with reservations.

"Mine's the latest model," says Curly. "Built-in refrigeration unit—heater—an automatic sign turn-on for night. Takes any combination of coins."

"However," he warned, "those machines aren't cheap to buy... or operate. They run about \$500. If you're not on the main highway like I am—where lots of city

people pass—you'd better stick to the old methods."

From where I sit, you have to admire Curly for his pioneering spirit. Of course, there's also plenty to be said for those who tend to stick to the old proven methods. People's ideas differ on the subject—on any subject. Like you may always drink buttermilk with your meals... while a glass of beer's the "automatic" choice with me.
