## NEARLY 18 MILLION VISIT MICHIGAN STATE PARKS IN '55

A total of 17,845,574 persons entered Michigan's state park system during 1955, a new all-time record and a ten per cent increase from the record year of 1954.

Camping, too, showed a sharp rise. Some 89,313 camp permits were issued compared with 80,604 in 1954, an increase of nearly 10 per cent.

All but three of the state's 59 parks and recreation areas showed attendance gains.

And for the first time in history, a total of four state parks entered more than 1,000,000 visitors.

Grand Haven in 1955 led the state with 1,485,040 attendance. Holland was second with 1,311,295; Dodge Four was third with 1,156,315; and Bay City fourth with 1,013,751.

In 1954, Holland, Grand Haven and Dodge Four were the million-plus parks and led the state in attendance. Some 15,228 persons used state parks in 1954.

Of the leading parks, Muskegon showed the sharpest popularity hike, pumping from 550,945 attendance in 1954 to 858,218 in 1955, an 81 per cent increase. The park moved from eighth to fifth place in public preference.

Other leading parks were Isle Royale with 301,800 attendance; Sterling with 252,613; and Rochester - Utica with 279,057.

### Looking Ahead BY DR. GEORGE S. BENSON

(Continued from Page 2B) I feel that the term, "The American way of life," is an abstraction that cannot be defined. This is a propaganda trick designed to keep Americans contented and disoriented on important fundamentals.

The third film is entitled, "The Structure of the American Way of Life." It shows the building up of an imposing pyramid-like structure of simulated granite blocks. Each element in the American way of life; and as it is fitted into place its meaning and purpose are clearly explained. There are 22 blocks of varying size, 22 vital and specific elements forming the structure of our freedom. It is a structure all Americans can embrace. It is something, complete, to stand for.

Though our system and its motivating spiritual foundation, the United States and its leadership — can we maintain our progress? History suggests that we could but that we won't. In "The Fall of Nations," the fourth film of the series, we see dramatized the rise and fall of all the great world leaders. None has survived very long. The cause of the fall of nations are studied in this film. The major ones are: political, economic and moral decay among the people. Will America survive? This film poses this question dramatically.

Next week: The three ideologies.

### Middle Income Class Increasing Steadily

The number of families making \$5,000 to \$10,000 increased 80% in the past five years, according to research authorities. In 1950, there were 8.7 million such families, just 19% of all families. In 1955, there were 15.7 million families in this income bracket, and they represent 32% of all families. The authorities point out that this expansion of "middle incomes" is largely responsible for the boom in sales of autos, houses and appliances.

## STATE MINERAL PRODUCTION UP, AUTHORITIES SAY

Michigan probably set new U. S. records in 1955 in production of salt and gypsum and limestone for steelmaking.

In addition to leading the nation in production of the three materials, the state also ranked high nationally — and may have set new state records — in production of portland cement and sand and gravel.

Final state figures won't be available for several months, but Conservation Department geologists say they expect new records when the totals are completed.

The state totals contributed heavily to a new U. S. mineral production record of \$15.8 billion.

### Michigan Mirror

(Continued from Page 2B) would cost \$200 million in new buildings.

Legislators, who abhor new taxes and deficits, are really working on this one. Vander Werp said his decentralization plan could save the state "at least \$50 million" of the figure.

Michigan will probably have the answers in 1957 when the study is completed.

MOTORISTS WILL SEE Michigan's new speed limit signs along the highway before the new laws become effective.

Highway department crews already are posting the roads with speed limit signs, reading 65 in the daytime and 55 when the headlights strike the same sign at night.

It is a money-saving and confusion-saving device, putting both speed limits on one sign.

Roscoe Heffron, of the state highway department's traffic analysis staff, said the sign will be in place "as a reminder" weeks before the law becomes effective next February 2.

Already Governor Williams has asked motorists to observe the speed limits on a voluntary basis — an attempt to cut down on the holiday traffic slaughter.

On February 2 it will stop being a voluntary thing, and speeders will get tickets for speeding.

### CHRISTIAN SCIENCE

Why the spiritual qualities of honesty, unselfishness, and obedience are important to an understanding of Truth will be brought out at Christian Science services Sunday.

Scriptural selections to be read in the Lesson-Sermon entitled "Truth" will include Jesus' parable of the sower and his explanation of its meaning for his disciples.

Correlative passages will be read from "Science and Health with Key to the Scriptures" by Mary Baker Eddy.

If one would be successful in the future, let him make the most of the present.
