### Information "On The Line"

I was reading the other day how a person can sed all sorts of things just by dialing a number. In New York you can not them, the weather, or a piracy. In Philadelphia it's the speck reports. In Baston a voice tells bird watchers what's to be watched in the park. Over in Europe, they go further, Vienia offers a five-minut fairly tale for kids. In Switzerland you can get the news in any of three lithrunges, and a couple of places have "calking menus" for desperiate housewieves.

### We Add The Odor To Protect Gas Customers

Before natural gas enters the city mains it has no odor. As a safety measure we add a harmless chemical to provide an aid to leak-age detection. This is only one of many steps

taken by the gas industry to assure safety.

Every piece of pipe, every joint, is inspected and tested before and after it goes into the ground.

The American Gas Association operates extensive testing laboratories to make sure the gas appliances you use conform to rigid safety requirements.

Constant vigilance by all branches of the natural gas industry keep it one of the safest fuels in home or industry.

Only GAS does so much, so well . . the modern fuel for automatic cooking . . . refrigeration . . . water-heating . . . house-heating . . air conditioning . . . tothes-drying . . . Inclineration.
