The Party members, follow the Party line through our press... through mass meetings, lectures, and all struggles in the forefront. We must point out: First, that their actual work is appreciated by the Party; second, that we consider their work Communist work and want them to continue it.

About half of the hardcore Communists in America are stationed in New York state; the next largest number in California. They are concentrated in vital areas of production, transportation, shipping, and in the communications agencies where propaganda and thought-shaping can be conducted most widely.

The influence of each single Communist is far-reaching.
