Looking Ahead By Dr. GEORGE S. BENSON (Continued from Page 28)
It's their business to make truble and outly. They are concentrating, however, on two points: First, to create misunderstandings and baleations between employers and employees; and, secondly, to unsell an oncoming generation of American youth on the fundamentals of our way of life — failth in Gode private enterprise economic system.

When any force is loose in antition, threatening the security of the people, the people should get together and stamp it out. We would not think of permitting or arrier of chiptheria, scarlet fever, or any deadly disease to run at fewer of the control of the control of first and towork for the control in the destruction of our nation and the mass killings: to which the Communists are dedicated. We should stamp out the last vestige of its operation in our nation.
