

Looking Ahead

By DR. GEORGE S. BENSON

(Continued from Page 2B)

9. Government ownership of industry would bring labor under bureaucratic control and tend to make the American worker a servant to his government.

10. The New York State Federation of Labor, with 1,300,000 members, has endorsed private development of Niagara.

The electric workers who put up their own money thus to have their say, added these powerful words: "We like the free enterprise system that has made America great and the life of the American labor man the envy of the world. Our American system of getting things done makes sense—we want to retain it."

This wholesome attitude is born out of a clear, penetrating knowledge of the economic facts of life, and a common-sense appraisal of what's best for all Americans.

Now Enrolled At Marygrove

Enrolled as a freshman this year at Marygrove College in Detroit is Judith Carole Jargowski, daughter of Mr. and Mrs. Leon H. Jargowski of Ten Mile Road, Farmington.

She, along with other members of the freshman class, was informally welcomed onto the campus the early part of the month at a traditional bonfire rally.

The girls were presented with green and gold freshmen caps by their junior class big sisters. They will be required to wear these caps until the more formal Founder's Day program, at which time they will don the academic cap and gown.

Judith plans to enter the field of home economics as a teacher. Doug Byron, a 1955 graduate of Farmington High, has returned to Olivet College to resume his art studies.

New Oakland County Health Center In Pontiac Dedicated September 23

An open house and official dedication of the new Oakland County Health Center was held on Sunday, September 23, at Pontiac, with Congressman George Dondero and Lt. Gov. Philip Hart present as guests.

The new health center, of modern design, is laid out to provide all the facilities which modern medical science requires for the care of public health in the county. It is also designed to accommodate future expansions and services not now required.

The first floor and the building contains a complete Tuberculosis Control Clinic, a Dental Clinic, and a series of Medical Treatment Rooms as well as a large waiting room. On the first floor there is also a play terrace for children, adjacent to the waiting room and offices for field nurses, sanitarians, statisticians, a medical examiner and public health offices.

Close to the main entrance and receptionists desk are the administrative offices for the medical director and his assistant. Adjacent to the entrance lobby there is also an assembly room which will be used for public health instruction. The room can be divided into four small conference rooms with facilities for a small serving kitchen by means of folding partitions. A library where current health literature will be assembled is also provided on the first floor.

In the basement is film storage and general storage rooms, a mimeograph room, mechanical equipment room and rest rooms.

The total cost of the building, including equipment, was approximately \$300,000. Of this amount,

34 per cent has been met with Federal funds made available under the Hill-Burton Act and administered by the Office of Hospital Survey and Construction for the State of Michigan.

Federal participation in the cost of the building came through the interest and efforts of Willis M. Brewer, former director of the Office of Hospital Survey and Construction for the State of Michigan, Lt. Gov. Philip Hart, Congressman George A. Dondero and Henry W. Horton, chairman of Buildings and Grounds, and his committee.

Programming and planning the functions to serve Oakland County public health needs were Dr. John D. Monroe and Dr. John C. Lambie.

DEATH ON STATE'S HIGHWAYS SURGES UPWARD THIS MONTH

Michigan's outstanding record this year in reducing deaths on the highway has taken a nose dive in September, bringing a warning from State Police Commissioner Joseph A. Childs that even deadlier months are ahead. Up-least drivers and pedestrians alike pay more attention to the job of saving their lives.

For five consecutive months prior to this month and contrary to the national trend, traffic deaths in Michigan were less than in the corresponding months of last year, Childs said.

Childs pointed out that although deaths were higher the first three months of the year, the total for the first eight months was 137 less than the 1,251 who lost their lives in the same period in 1955. Final verified figures may show what increase the death total, but even allowing for that the state was well on its way to the goal of saving 200 lives this year. September threatens to upset this hope.

If the present trend continues, September will wind up as one of the worst on record, with total deaths approaching 200. Last year the total was 159. The record high was 204 in 1936 and the second high 202 in 1937. The highest post-war total was 187 in 1953.

"The outlook for the rest of the year is not good unless drivers and pedestrians reverse the present trend through a determination to stay alive by conscientiously following the rules of safety," Childs said. "The early fall and winter months are the most deadly of the year."

"Pedestrian deaths especially have always shown increases in the fall and winter months. But certainly having demonstrated that we can save lives in Michigan even though the national trend is the other way, there is no reason that we can't continue to do so in the months ahead. Everybody in the state has been very proud of our record, but I hope they don't feel that now they can take it easy and drift. Constant vigilance is the price of safety, but it's a cheap price to pay for such a valuable product," Childs concluded.

A chemical plant using coal for raw material in West Virginia also utilizes every day the energy equivalent of 3,500 tons of bituminous coal. Its steam production would meet Cincinnati's daily needs and daily electricity consumption at the plant is equal to that of Dayton, Ohio.

Civil defense officials indicated that they are now prepared to provide families with information on how to best prepare for self-survival programs for use in the event of a major disaster.

LEGAL NOTICE

Statement Required by the Act of August 24, 1912, 37 Stat. 532, as amended, and the Act of March 3, 1933, and July 2, 1946 (Title 35, United States Code, Section 233) showing the Ownership, Management, and Circulation of The Farmington Enterprise, published weekly at Farmington, Michigan, for October 1, 1955.

1. The names and addresses of the publisher, editor, managing editor, and business managers are:

Publisher: A. C. Tagg, 33614 State Street, Farmington, Michigan; and James M. Tagg, 22933 Powers Road, Farmington, Michigan.

Editor: Michael J. Kiley, 23197 Hawthorne, Farmington, Michigan.

Managing Editor: James M. Tagg, 22933 Powers Road, Farmington, Michigan.

Business Manager: A. C. Tagg, 33614 State Street, Farmington, Michigan.

2. The owner is (If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding 1 percent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address, as well as that of each individual member, must be given.)

James M. Tagg, 22933 Powers Road, Farmington, Michigan.

A. C. Tagg, 33614 State Street, Farmington, Michigan.

3. The known bondholders, mortgagees, and other security holders owning or holding 1 percent or more of total amount of bonds, mortgages, or other securities are: (If there are none, so state.)

None.

4. Paragraphs 2 and 3 include, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other capacity, the name of the person or corporation for whom such trustee is acting; also the statements in the full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner.

5. The average number of copies of each issue of this publication sold or distributed, through the mails or otherwise, to paid subscribers during the 12 months preceding the date shown above was: (This information is required from daily, weekly, semi-weekly, and tri-weekly newspapers only.) 3,760.

Sworn to and subscribed before me this 28th day of September, 1956.

Inez Edgar
(My commission expires November 29, 1957.)

October 11, 1956

Transportation of coal by water away from the mines is growing. In 1950 some 27,500,000 tons of coal—3.3 per cent of national production—was loaded directly into barges at river points, while in 1953 more than 35,500,000 tons were loaded into barges or at most 8 per cent of total production.

The way some business executives sign a routine letter you'd think it was a death warrant.

Two Local Boys At Cranbrook

Two Farmington boys are among the 375 students now studying at Cranbrook School in Bloomfield Hills. It was disclosed this week.

Thomas S. Semper, 15, son of Gladys Malcolm, 31301 Thirteenth Mile Road, is in the tenth grade, and in addition to his scholastic pursuits, has found time to join the Cranbrook Pre-Med club. He previously attended Farmington Senior High School.

Leslie Perrin, son of Dr. and Mrs. L. Leo Perrin, 24000 Inkster, is a eleventh grader and currently trying to win a berth on the Cranbrook tennis and archery squads. He is 16 years old and a former student at Southfield High School.
