

### Forest Hills Association To Meet On November 5

The Forest Hills Association will meet on Monday evening, November 5, at the home of E. R. Warnke. Included on the agenda will be the election of officers, due to the expiring of terms for existing officers. Action will also be taken to conclude the business of the annual meeting.

The San Diego Zoo ranks as one of the largest zoos in the world, with over 3,500 animals representing 83 different species.

VOTE, November 6th.

### Northwestern Hwy Extension To Provide Expressway To North

Details on the extension of Northwestern Highway from Orchard Lake Road to a junction with the Fenton-Clio expressway (U.S. 23) southwest of Fenton were disclosed last week by the State Highway Department.

The Oakland County Road Commission has entered into a contract with the Highway Department for the construction by issuance bonds of the highway, a distance of 27 miles, from Eight Mile Road northwesterly to the junction point. Work is scheduled to start next

spring on the first phase of the road construction program which will be the laying of 15 miles of four lane highway from Orchard Lake Road to M-59. This project is scheduled for completion in 1958. Extension of the highway from M-59 to Fenton is slated for completion by 1959.

Already Highway 5 is a 34 mile expressway from south of Fenton to a point north of Clio. Present plans call for completion of this entire expressway before the end of 1957.

U.S. 19 and U.S. 23 (dualing) is now four lanes from north of Clio, for a distance of nine miles, to a connection with the southern end of the east by-pass of Saginaw just southeast of Bridgeport. It is planned to relocate this stretch of highway and construct it as a four lane divided limited access road as part of the Interstate System.

Two lanes will be added to U.S. 23 from this point north to M-81 in 1957 to make a four lane divided limited access highway. From here four lanes of divided limited access highway will be constructed to Zilwaukee and thence to Kawkawlin to connect with present U.S. 23. From this point to Standish, U.S. 23 is already a four lane divided highway.

The extension of Northwestern Highway from Orchard Lake Road is thus to become an important link in providing a direct expressway route to the north country. Residents from the Farmington area will be able to enter onto the Northwestern Highway expressway route from the north country and west, proceed, by-passing all large cities, to the "gateway" to northern Michigan.

Speculative plans, it was indicated, call for the use of one lane of the present Northwestern Highway in Southfield Township and that portion to the northwest as far as Orchard Lake as a local road. Two more lanes would then be added on either one side or the other of the present divided Northwestern to provide the same limited access setup.

PAVING of Violet Street and a part of Lilac Street in Floral Park Subdivision got underway late last week. As fast as dirt and gravel can be removed from the present roadways, another section of concrete is being laid in the race to complete the entire project before hard freezing weather sets in. This picture was snapped Saturday as workmen prepared another section of road for concrete.

### Check Heating Unit, Authority Urges

Heaters which bring warmth to your household this winter may also bring death, warn authorities from a leading national insurance company.

Hundreds die from fires every year in the United States, and many of these deaths are the direct result of faulty heating equipment, they say. Oil space heaters and kerosene range burners can be very hazardous, they claim. They cite the difficulty of frequent refilling. But you should also check to make sure burners are leveled, you have proper draft, and the tank is correctly positioned.

If you use a portable heater as a makeshift clothes dryer, you may have more than damp socks to worry about in the morning, the Institute warns.

In power burners, the biggest cause of fires is delayed ignition.

With oil pouring into the burner, an explosion can occur at any time. At the start of each heating season your burner should be checked by a licensed burnerman to make certain that the heating system is in proper working order, they say.

A big cause of fires in heating equipment is the "do it yourself" burner installation man. The Institute warns only an expert knows the proper clearances for various heaters and keeps in mind the closeness of combustible materials.

"Bottled gas," such as propane and butane, can be dangerous if your tank springs a leak. Heavier than air, the gas could settle under your house—just ripe for an explosion.

The Institute points out there is no nation-wide requirement that heating equipment be checked for fire safety before being sold.

COLOR BLIND

Ten times as many men are color blind as women, according to statistics released by the Murine Company of Chicago. One man in 25 suffers from this malady, while it affects only one woman in 250. Color blindness is an hereditary factor which shows up in a girl only when both parents are affected—while only one color blind parent is enough to pass this ailment along to a son.

More than 4000 retail lumber yards now stock hardwood plywood, primarily because of increased demand for the material in home workshop furniture projects and wall paneling. Most dealers stock a variety of species and sizes.

### SPECTACLES

The use of eyeglasses did not originate in the long-distant pre-Christian era as many persons believe. While the first inventor of spectacles is not known, the first historical reference to the use of lenses as a means of aiding sight points to Bacon. Bifocal spectacles were invented by America's many-sided genius, Benjamin Franklin.

Although Michigan is a state university, only 44 per cent of the cost of the buildings on campus came in funds provided by the State Legislature.
