PLASTIC THROATS are helping improve the cure rate for some cancer patients according to reports from the Third National Cancer Conference held at Detroit recently. The oil-based, polyethylene throats are being used to replace removed tissues in areas where the food is swallowed and starts on its way through the stomach, thus restoring continuity of the digestive tract. Economical, dependable petroleum products are among medicine's newest allies in its fight against cancer.

Republican GENERAL ELECTION (DONATED BY FRIENDS) Nov. 6, 1956

You Voted for PEACE ... AND GOT IT!

Now Your Vote Is Needed To Protect It!

- President Eisenhower brought us peace. Ike brought us prosperity, too, without having American boys dying on foreign soil to pay for it! You can put your trust in President Eisenhower.
- But, can you trust the future of your children, your home, your job, your country to the Democratic Party that is advocating weakening of our defense? Can you? You be the judge on November 6th at the polls!
- Every man and woman in Michigan should read this editorial from the Detroit Free Press (October 23) before voting:

Excerpt from editorial in The Detroit Free Press, Oct. 23, 1956.

"By injecting his own ideas and preferences, Premier Bulganin (of Russia) took sides in the campaign. He currently endorsed Adlai Stevenson's position on the issue, if he did not endorse Mr. Stevenson. But any American is entitled to the opinion that he did.

"The President's reply to Bulganin was an equally well-deserved rebuke to Mr. Stevenson.

"The latter invited Russian interest by raising, in the heat of a political campaign, an issue which is so closely related to the defense of this country that it has no proper place in politics.

"Bulganin took advantage of the opening which Mr. Stevenson provided him; it was as improper as if the Communist leader had offered his services to the Democratic aspirant about any other phase of United States defense policy, including the size of the Air Force.

"It can hardly be thought that Bulganin's preferences in regard to H-bomb tests would not conform to Russia's interest.

"What Bulganin said in his letter, in effect, was that he would prefer to do business with Mr. Stevenson on the bomb issue, rather than with President Eisenhower.

"The implication of this should not be lost on the American voter. Twice before, at Yalta and Potsdam, the Russians dealt on matters which shape Administrations history to the Red's advantage. They have not done so well with the Eisenhower Administration. It is understandable that the Kremlin would be happy dealing again with Democrats in charge of our foreign policy."

DOCTOR OIL

Petroleum is always on call in modern hospitals. One contribution to medicine is ethyl alcohol which is used in treating acute lung congestions that may occur immediately after surgery. The alcohol vapor, administered with standard anesthesia equipment, reduces the amount of foam forming in the air passages, allowing the patient to breathe freely. This new treatment for pulmonary elements, along with anesthetics, germicides and disinfectants, is part of the long list of benefits made available by oil.
