nothing but blue skies from now on with an automatic GAS CLOTHES DRYER IF AN APPLE A DAY KEEPS THE DOCTOR AWAY, business may drop off considerably in the medical profession during the months ahead. A bumper crop—some 10,500,000 bushels of Michigan apples—is reported by Holland F. Patterson, executive secretary of the Michigan State Apple Commission. The yield is valued between \$20 and \$21 million. "The crop would reach halfway to the moon if laid end to end," Patterson reported as growers in the state harvested more than one and one-half billion apples. "The Michigan crop is the third largest in the nation. Only Washington and New York produce more. While such favorites as Jonathan, McIntosh, Northern Spy, Red Delicious and Wealthy continue to be the most prominent Michigan apples, there are 40 varieties marketed from our state. "Because this year's apple crop is superior in quality, flavor and color and because of the excellent apple production is down, Michigan growers are in a favorable spot," Patterson concluded.
