Why do we wrap things we're not going to move?

When we begin wrapping your stairway, don't get shook up.

We're not going to pack it into our moving van. That wrapping is for protection only. Keeps your stairway from coming up with a batch of dents, nicks, and scratches. It also keeps your furniture from coming up with a batch of dents, nicks, and scratches.

After watching the way we worked, one lady actually said to us, "You Bekins men are fussier about taking care of my furniture than I am."

That's the way we feel, all right. We think it's our responsibility to not only look out for the furniture we move, but also for the house we go in and out of. We pad stairways. We cover floors with runners

where we'll be tramping around. And we pad every piece of furniture with heavy blankets as we put it on our van.

But this protection would be a waste of time if we didn't have one more thing: the best-trained moving men in the business.

Every Bekins man must go through a long, tough training period. He has to be plenty sharp to make it. A few men do. Those few are the kind of moving men the lady above was talking about.

They're good enough to move anything without all that wrapping. But they know better than to chance it.
