But like of each thing that in

How to add a room ...

without cooling off
the rest of the house

consider electric heat

The minute you try to heat a newly finished room, you place an extra burden on your existing heating system. There's a better way.

Give that new room its own heating system—a modern flameless electric heating system. It's clean. It's comfortable. It's perfectly controllable. You simply dial the heat you want and you get it, exactly, without stealing heat from the rest of the house.

How much will this modern way to heat cost to install and operate? That depends on your particular home. One thing sure, it won't cost you a cent to find out.

An Edison Heating Specialist will gladly come out to discuss equipment and cost of operation estimates with you. (It's amazing how accurate these estimates prove to be.) There's no obligation, of course. Just give us a call.
