FOUND: SURE CURE FOR THE HIC-CUPS

Ever try and start your engine on a cold morning and have it start hiccupping and gulping like it's been on a three week binge? Know what I mean?

Well I gotta tell ya! I found the cure P-D-Q right here in Farmington. How about that!

All you gotta do is wheel your old buggy into the Service Department at BILL ROOT'S CHEVROLET and ask for P.D.Q. Service. What could be easier?

Say, they got mechanics there that really know what makes an engine tick or hiccup. Why, in no time at all they had my engine purring like a kitten. That's what they mean by P.D.Q. - Prompt (D)ependable (Q)uality Service.

How about you? Not going to let cold weather get your car down, are you? Take the cure. Come to BILL ROOT'S, P.D.Q., of course.

Scientific Formulas Make Safer Driving

Scientific formulas are helpful in many ways. Here are two simple formulas about driving and car care which could save your life! Maintain one car-length between your car and the car ahead for every 10 miles per hour of speed; and one ounce of pressure against the windshield for every inch of windshield wiper blade length. In other words, don't ride the other fellow's bumper, and be sure your windshield wipers are capable of doing a good job for you. Then you'll be able to see trouble while you still have time to do something about it. Have your garage check your windshield wiper; your following distance you can check for yourself.

The average American uses about 47 pounds of paper a

year.
