

Golden Age Club Has Party

The Pioneer Golden Age Club of Farmington was entertained at a New Year's Party on Dec. 30 at the home of Mr. and Mrs. Andrew Wittwer on Poppermill Drive, Farmington, by Mrs. Wittwer's mother, Mrs. Mabel Burgess.

Twenty of the club's members were present and enjoyed an afternoon of cards and singing. Prizes were awarded to Frederick B. Willis, Mrs. Doris Jones, Mrs. Stephen Makowski and Herbert C. Long, Sr.

The card tables were beautifully decorated with modern cloths handmade by Mrs. Burgess. The house was gayly decorated inside and out in the true spirit of Christmas. Even the rose garden was decorated and lit up brightly.

In May, 1964, the Coast Guard placed in operation the world's first atom-powered lighthouse in Chesapeake Bay, Md. It is anticipated that ultimately automatic facilities will supplant many of the manned light stations now in use.

Enough for this week, the second half review of last year will be next week. Currently, my apologies for omitting Gus Flower's name from last week's column: as chairman of the judging committee for the lighting contest, and for misspelling new bride Wayne Moore's new name. The bridegroom is Jon Lusk, not Lutz as reported.

A nickel stainless steel replica of Princess Margaret's diamond-studded crown, 14 feet wide and weighing 2,300 pounds, is on display on the roof of a hotel in Bermuda. Hand made in Canada, of the gleaming steel, at a cost of more than a \$20,000, the crown took eight men one month to build.

Snow-Blindness Can Happen To Farmington Area Motorists

Some people think snow-blindness is something that happens to Eskimos. Farmington Township Police Chief Irv Yakes says it can happen here on any Farmington street.

"They're talking about two different things, perhaps, but it appears the chief has a point. It's talking about winter-blindness, caused when heavy snow or any of several other possible winter conditions, seriously reduce driver vision."

REDUCED visibility is a real problem to local police departments according to the International Association of Chiefs of Police because it's a cause of accidents and a spoiler of city safety records.

"One thing that limits our visibility at this time of year more than we realize is the serious arrival of dusk and darkness," Chief Yakes observed today. "While we are proud of our street-lighting system, which meets or exceeds recommended standards in most parts of the city, no one would claim that it duplicates broad daylight. Things are just harder to see at night, and this includes pedestrians," he emphasized.

"And, day or night," continued the chief, "winter has a lot of tricks that can turn driving into a murderous game of blind man's bluff, if we're unprepared."

CHIEF YAKES warned of "snow-blindness" caused by heavy snow accumulating on the windshield—in the absence of a strong, effective windshield wiper.

He reminded drivers that heavy fog can be expected at this changing season of the year.

He spoke about accident investigations in his experience, in which the cars involved were found to have windows covered with frost, and the drivers complained that they didn't see the other car coming.

"Every driver is required by law to have and maintain proper headlights, taillamps and turn signals," the chief emphasized. "These will help him to see others, and others to see him, if used properly. But he should remember that when headlights are required, parking lamps won't do."

"AN ADEQUATE defroster-heater will help keep his windshield and windows clear, but if he neglects it and it fails him, he fails as a driver."

"If he has taken the precaution of changing dead windshield wiper blades, baked by the summer sun, they will do the windshield-clearing job required of them; and an ordinary brush-and-scraper can be used to clear the snow from all other windows, not just from a small peep-hole on a side-window, before starting out."

Drivers with 20-20 vision are not immune to "winter-blind-
