## Snow in Mind Of Library Bd.

Don't wait until the snow flies to get the snow shovel out is the apparent philosophy of officials of the Farmington District Library Board.  
An official request was made by the library board officials to have the City of Farmington handle snow removal in the parking lot area and on the walk in front of the library this coming winter in a letter which was read at the regular City Council meeting Monday night, May 17.  
The councilmen agreed to having the city enter into a contract with the library system officials for a three year period at a satisfactory hourly rate after being assured by the city manager that the city had the equipment and time to do the work. The manager was instructed to work out the details.  
The city manager estimated that the cost would probably run between \$5 and \$7 per hour and that a small tractor used to clean the area around the municipal building could be used. It was made clear that the area around the municipal building would get cleared first and the library parking lot and sidewalk afterwards.

**Robert Johnson Takes Faculty Post at U of D**

We Endorse The Orthopedic Surgeons' Resolution on Children's Footwear

"During the past several years, there has appeared in the shoe market an ever increasing tendency towards 'styling' children's and teenagers' shoes, an apparent attempt by the manufacturers at duplication of the adult female's pointed toe styles. In many parts of the country, only these 'styled' shoes are available for purchase.

"Since it is the aim of the Orthopedic Surgeon to 'maintain and preserve' the musculo-skeletal system, then it is his main responsibility to guide the proper development of the growing child. With this principle in mind, and knowing that this improper footwear can result in various foot deformities: Be it here resolved that the Academy of Orthopedic Surgeons deny the influx of these 'stylized shoes' and urge the shoe industry to carefully review this problem and to 'redefine' this footwear to allow the unencumbered development of the growing foot."

We applaud and endorse this resolution.
