Less Food Dollar Goes to Farmer

Consumer demands for more services and packaging account for much of the recent increase in food prices.

The result is that the farmer's share of the food dollar has been shaved and is expected to average only about 40 cents this year. Ten years ago, the farmer's share of each dollar the consumer spent for food.

Earl Brown, food retailing specialist at Michigan State University, says that as today's consumer wants her chicken, for instance, dressed, cleaned, cut up and packaged, the farmer's share of the food dollar is going to continue to be 10%.

But he goes on to say that retailers are getting only about 20 cents of the food dollar and that they are working hard to improve their efficiency to keep retailing costs from climbing. Brown feels this in turn will mean more of the marketing profit available to producers.

Self-serve supermarkets have contributed much to cutting food retailing costs. Brown believes. Mark-ups are relatively small as these stores depend upon volume for profits.

The awarding of a General Educational Development (G.E.D.) diploma to Norman L. Wallace was approved by the Farmington School Board Monday night.

Attendance at Kensington Park Should Double, Say Authorities

Greatly improved ingress and egress at Kensington Metropolitan Park, thanks to the "Huron-Clintontown-Brighton" expressway opened last week, has the Huron-Clintontown Metropolitan Authority preparing for double the attendance at that entrance.

Kenneth L. Hallenbeck, director of the public park and parkways authority of South Kensington, said the unit, said that with traffic jams eliminated on the state highway (US-16) the park's attendance for 1958 might hit three million.

Attendance at the park, located 33 miles from Detroit City Hall, off Grand River near New Hudson, has topped a million and a half in 1956 and 1957, a figure greater than the attendance in any national park.

"The Huron-Clintontown Metropolitan Authority contributed nearly \$80,000 (sixty thousand dollars) to provide bridges and extend the parkway at the east entrance of the park," Hallenbeck said.

He continued, "Now it will be necessary to move the information center building at that entrance farther into the park because the interchange extends into our property. We will also enlarge that park, where large picnic groups usually meet, and parking and picnic areas elsewhere in the Kent Lake region to accommodate more people."

"We do not anticipate enlarging the 120-acre lake but we do plan to make fuller use of the shoreline," he said.

The authority is immediately concerned with the balance of park roads with a "higher type" black top of the variety used in city streets. It is a steel asphalt in contrast to the kind containing gravel. Major part of the parkway and other roads already have been so treated.

"Our larger attendance—it has snowballed in recent years and we expect a total of 12 cases of typhoid have been reported to the Michigan Department of Health.

"Typhoid fever once caused many deaths and much concern in Michigan," Dr. L. Deeder said. "It was brought under control by a combined program of filtering and chlorinating public water supply, building efficient sewage disposal plants, and prohibiting typhoid carriers from working with food."

"We must keep these controls in effect at all times," Dr. Deeder said, "or typhoid will spring back at us at the first opportunity."

He said the persons most vulnerable to typhoid fever are those who are helped by private wells and private sewage disposal systems. He urged these people to take special care to keep their wells and sewage disposal systems clean.

If there is any question about whether a well is contaminated, the owner should request the local health department to inspect it. Dr. Deeder suggested.

Typhoid is spread by food or water contaminated with excreta from persons who are or have been infected with typhoid. Some people who recover from typhoid continue to pass the typhoid bacillus, and these people are known as "typhoid carriers." They are required to register with the state health department and they are restricted as to the kind of work they can do. At the present time there are about 200 registered typhoid carriers in the state.

Private Wells, Sewer Systems Need Special Care

Recent occurrence of new typhoid fever cases in two southern Michigan counties points to the constant need for safe water supplies and sanitary disposal of sewage.

Dr. S. L. Deeder, director of communicable diseases for the Michigan Department of Health said today.

Through November 22 of this year, a total of 12 cases of typhoid had been reported to the Michigan Department of Health.

"Typhoid fever once caused many deaths and much concern in Michigan," Dr. L. Deeder said. "It was brought under control by a combined program of filtering and chlorinating public water supply, building efficient sewage disposal plants, and prohibiting typhoid carriers from working with food."

"We must keep these controls in effect at all times," Dr. Deeder said, "or typhoid will spring back at us at the first opportunity."

They are required to register with the state health department and they are restricted as to the kind of work they can do. At the present time there are about 200 registered typhoid carriers in the state.

Ask \$30 Million For Improving Park System

A \$30,000,000 bond issue to provide funds for improving Michigan's state park system was proposed by the state Conservation Commission at its December meeting in Lansing.

The Commission recommended that the bond proposal be placed on the ballot for a public vote at the November, 1958 state election.

Some parks administration, to charge also was advocated, to aid in paying off the bonds.

Commissioner Robert F. Brevitz, chairman of the group's parks committee, said the Commission "is not a fundraising agency but one of the responsibilities of this Commission is to provide recreation to the Legislature."

Brevitz' motion, which received unanimous approval, stated: "I move that this Commission recommend to the Governor and the Legislature that they present an opportunity to the public at the November, 1958, election to express their willingness to bond the resources of the state to the extent of approximately \$30,000,000 for the purpose of providing funds for land acquisition and capital outlay master plan for state parks and recreational areas, and that we will also approve such fees and charges as seem reasonable, to be returned to the general fund, to assist in paying off said bonds."

Survival IS NOT ENOUGH!

"And fish of all kinds were plentiful in the harbor. A hook anywhere in the bay and at any time the year would take Mackinac trout, as many as one would want. And if a net were set anywhere in the harbor, in the morning it would be loaded with fish of all kinds. Every big council of the Indians was transacted in the village of Little Traverse."

"I thought my people were very happy in those days, when they were all themselves, and possessed a wide spread of land, and no one to quarrel with them as now where they should make their gardens, or take timber or make sugar."

"And fish of all kinds were plentiful in the harbor. A hook anywhere in the bay and at any time the year would take Mackinac trout, as many as one would want. And if a net were set anywhere in the harbor, in the morning it would be loaded with fish of all kinds. Every big council of the Indians was transacted in the village of Little Traverse."

Join THE MARCH OF DIMES

Automobile registrations in Oakland County increased in 1957 to 42,900 from 21,100 in 1955, according to data of the Oakland County Planning Commission.

The survey shows that car ownership nearly tripled in the ten year period.

Township Board Rules Outlined In M.S.U. Manual

"The Michigan Township Board," a handy packet, sized manual just published at Michigan State University, should prove to be of value to citizens interested and involved in local government.

The manual details township board powers, duties, modes of procedure and parliamentary rules in an easy-to-read outline for 4,339 manufacturing companies.

The manual does more than just examine existing legal positions. It reflects an examination of how actual legal rules are being applied in Michigan. It compares the law, traditions and day-to-day practices of the boards.

Prepared under sponsorship of M.S.U.'s Governmental Research Bureau, the manual was written by James and Marilyn Blawie, a husband and wife team formerly on the university staff.

D. Hale Drake, president of the Michigan Institute of Local Government, and William D. Denison, secretary-treasurer of the Michigan Association of Township Supervisors, participated in the project. Many township board members were interviewed.

"Township officials generally are not full-time jobs," Mr. Drake pointed out, "so people holding them normally do not have time for extended research and reading. The most useful function of this manual will be to provide a simple and direct statement as to what boards can and cannot do in reference to definite problems, such as cemeteries, parks and fire service."

Copies may be purchased for one dollar from the Governmental Research Bureau, Morrill Hall, M.S.U., East Lansing, Michigan.

Good Way To Eat Your "Apple-A-Day"

Baked apples for breakfast. How long has it been since you've had them? On a chilly morning there's something pretty cheery about starting off breakfast with a juicy baked apple, still warm from the oven.

A good way to fix them is to fill the centers of each apple with orange marmalade before baking. If you're a calorie-conscious breakfaster, you'll especially appreciate the nutritional value. It recommends that you use dietetic orange marmalade which has a lovely calorie count of just 1-1/2 calories per teaspoon. Then, you further whittle calories by sweetening the apples with the non-caloric sweetener. You save nearly 100 calories in every serving!

An apple a day? Whether you believe the old adage or not, help yourself to some good eating by serving Marmalade Baked Apples at breakfast soon.

MARMALADE BAKED APPLES (Low-Calorie)

8 medium-sized red baking apples 2 cups water 2 tablespoons Sucaryl solution 1/2 cup dietetic orange marmalade or 48 Sucaryl tablets

Core apples and pare a thin strip from around top edge. Combine Sucaryl and water and bring to a boil. Stir in marmalade and food coloring. Place 1 tablespoon of marmalade in each apple; place in liquid in baking pan; bake in a moderate oven (350° F.) for about 45 minutes. Baste occasionally with the liquid. Makes 8 servings. Each serving contains 79 CALORIES; 0.4 gram protein; 0.5 gram fat; 20.4 grams carbohydrate. If made with sugar, each serving would contain 176 CALORIES.

Predict 1958 Sales To Be Up But Profits Down

Sales in 1958 should equal or exceed those of 1957, but profits are more likely to hold steady or even squeeze downward, the National Association of Manufacturers reports.

Reversing recent trends, there is a possibility that capital outlays for expansion may drop slightly according to a survey covering 4,339 manufacturing companies.

Forecasts by Members

Replies by 24 per cent of the 18,000 manufacturers to whom an N.A.M. questionnaire had been mailed gave these percentages in predictions for their own companies for 1958:

	Up	Same	Down
Sales	36	45	19
Profits	22	45	33
Expansion	19	35	25

To a question about the principal barriers to expansion in their own industries, 22 per cent of the manufacturers cited taxation. Increased costs were listed by 33 per cent; business uncertainty 21; tight credit 13; union demands 10.

As to the greatest problems facing American business as a whole, taxation was set forth by 22.4 per cent; labor, 21.7; business trends, 11.2 and costs, 9.3.

Petroleum power has helped to develop and increase the amount of mechanical energy available to do our heavy work by almost 300 per cent in some 10 decades.

TREAT HOLIDAY GUESTS TO A RICH NUT TORTE

During the holiday season, when even casual company calls for something extra special to serve as refreshment, there's no better sure to win you compliments. This one, which features pecans, is deliciously moist and has an exceptionally light, tender texture.

HOLIDAY NUT TORTE

3 cups Royal pecans 1/4 teaspoon salt
2 tablespoons flour 6 egg whites
2 teaspoons baking powder 1 1/2 cups sugar
6 egg yolks

Chop pecans very fine. Blend with flour, baking powder and salt. Beat egg whites until stiff and until they hold a peak. Gradually add 1/4 cup sugar, beating constantly. Beat egg yolks until thick and lemon-colored; gradually add remaining 1/4 cup sugar, beating constantly. Fold in egg white mixture. Fill in nut mixture. Pour into 2 round 9" layer pans lined with buttered wax paper. Bake at 350 degrees 30 minutes or until done. Cool on cake racks. Fill with whipped cream or pipe whipped cream garnish on top.

Local Man Has Driver's License Suspended

Anthony Witt of Farmington was reported among 29 Oakland County residents who had their driver's licenses either revoked or suspended recently.

Witt was among the group of 18 having their licenses suspended for habitual delinquency. Five more were ordered to furnish financial responsibility for drunk driving and six other to furnish financial responsibility for unsatisfactory judgment.

It isn't as simple as black, green, and orange peko. One American importer alone offers 30 variations of Chinese tea, and several flavors in Japanese.
