Why you are born and why you are living depend entirely on what you are getting out of this world and what you are giving to it. I cannot prove that this is a balance of mathematical perfection but my own observation of life leads me to the conclusion that there is a very real relationship, both quantitatively and qualitatively, between what you contribute and what you get out of this world.

"YOU CAN'T ESCAPE THE RESPONSIBILITIES OF TOMORROW BY EVADING IT TODAY"

Research scientists now agree any sickness, but is not soon overcome, can ravage your body, so that your life may be shortened. Therefore, if you evade your responsibility, by not taking good care of yourself when sick, you may not escape the penalty of future bad health.

It is easier to overcome any sickness or disease if the cause is quickly diagnosed and the proper treatment prescribed. Be wise. Always consult your physician at the very beginning and take the medicines he will prescribe so that you will get well more quickly.
