Nursery care only.

3 to Receive Caps, Gowns At Madonna

Three local girls are among the 100 who will be invested in the academic cap and gown at Madonna College, Livonia, Sunday, Nov. 22.

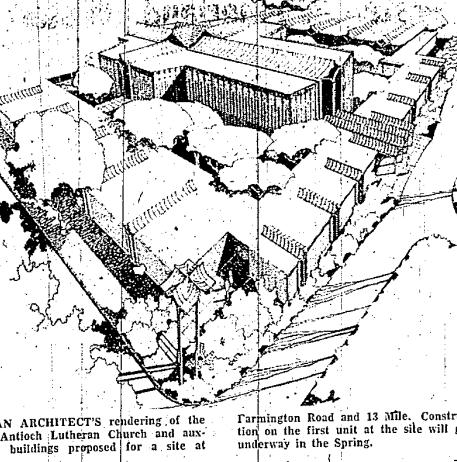

The vesting ceremony will take place in the campus chapel and will be followed by a short auditorium program. Fr. Edward Burkhardt, director of the Confraternity of Christian Doctrine in the Detroit archdiocese, will give the address.

Local girls participating are Patricia Harris, Carol Paski and Linda Weller.

Mavis Wyss, a junior, is also active on the Madonna campus. She is a page editor of the Madonna "Herald", the campus newspaper; and vice-president of the campus unit of the National Student Education Association.

The Rev. and Mrs. H. L. Perline were present at the meeting and Mrs. Perline gave a short talk on church appointments.

The vesting ceremony will be planned culminating with the traditional Thanksgiving dinner and senior ring ceremony on Nov. 23.

Farmington Road and 13 Mile. Construction on the first unit at the site will get underway in the Spring.

Church Plans Approved By Antioch Lutheran

With overwhelming enthusiasm, members of Antioch Evangelical Lutheran Church approved preliminary drawings and plans proposed by their building committee at a congregational meeting Nov. 8.

Members and visitors heard John Starkey, chairman of the building committee, present Antioch's proposal based on 10 months of extensive research into the needs and desires of the congregation. Many members contributed to the proposal by serving on sub-committees which investigated how the best from the Lutheran heritage could be put to the most functional contemporary use.

THE building committee has been finished, exterior studies just begun. The design will be a contemporary structure made of stone filled pre-cut building blocks. Some color will be used.

THE first unit which will ultimately be the Christian education building will be under construction in the spring at Farmington Road and 13 Mile.

Antioch Evangelical Lutheran Church is the United Lutheran congregation in the North Farmington area represented by the National Lutheran Council and approximately two thirds of all Lutherans in America. Antioch gets its name from the first mission congregation in the history of the church, and from the congregation whose members first began to name "Christian" applied to them (Acts 11:26).

THE PROGRAM of Antioch Church is worship centered and the space set aside for worship requires great architectural expression. The idea occurred to place worship in the very center of a court and group all the other activities around it. The resulting plan will have a large auditorium facing west and a Fellowship Hall to the east. Rising from within the garden enclosed by this growing out of, and towering above it, is the strong form of the church proper. This is the symbol of the church, the main structure, the central importance to Lutheran faith, man's salvation through the cross of Christ. The sanctuary is at the very apex of the cruciform, receiving natural light from a lantern above.

The worshiper will catch a glimpse of the altar through the glass doors as he approaches the main entrance. He will enter the north and sanctuary with the glass link through a court or the cloistered garden. The broad church aisle will be top lighted and will lead to the

ceremony. The organ will be in the organ loft, the organist will enter the church through the organ loft. The organ loft will be a quiet garden environment and a transition from the outside world before entering the "House of God" for worship.

Thanksgiving Service Slated

A special Thanksgiving service will be held on Thursday November 26 at 11:00 a.m. by First Church of Christ, Scientist, Farmington.

A period devoted to voluntary expression of gratitude for God's goodness is included in the Thanksgiving Day service in all Christian Science churches.

No collection is taken at this service, and local members have invited the public to attend.

The Thanksgiving Day proclamation of the President of the United States will be read at the service. Readings from the Bible and from "Science and Health with Key to the Scriptures" by Mary Baker Eddy will comprise the Lesson-Service for the day entitled "Thanksgiving".

Natural GAS

YOUR SILENT SERVANT

"Packing Houses" Aid Natural Gas Service

Natural gas is carefully "packed" as it travels along the 2,000 mile trip from the southwestern gas fields to Michigan customers.

Taking care of the "packing" operation are gas compressor stations about every hundred miles along the pipeline route. Here engines with thousands of horsepower squeeze the gas under as much as 1,000 pounds of pressure and force it through the pipelines. The pressure drops, as the gas moves along, until another compressor station "repacks" it, and pushes the compressed gas toward the next "packing" house.

The never ending work at the compressor stations speeds natural gas to consumers, improves service and helps keep gas rates low.

Only GAS does so much, so well...the modern fuel for automatic, cooking...refrigeration...water-heating...house-heating...air conditioning...clothes-drying...incineration.
