Check These

When Buying A Man's Shirt. Choose that dress shirt for "hubby", as carefully as you choose a blouse for yourself. Comfort, as well as quality and appearance, is important to the man who wears a dress shirt. Miss Bernetta Kahabka, clothing specialist at Michigan State University, says that a man's shirt should depend greatly on whether or not the fabric is porous enough to permit air to move freely through it. Fabrics made from wool, cotton, rayon, orlon and dacron, should be constructed in an open weave so that air may circulate. Other fabrics on the skin will not evaporate and the wearer will be uncomfortable. Cotton and rayon absorb moisture, and an open weave is not necessary. The many pins used to keep shirts neatly folded on the shelf make you need to wash and iron them frequently. Miss Kahabka suggests you unfold the shirt to check details that add so much to appearance and comfort and service of a shirt. The shoulder yoke should have a double thickness of fabric for good wear and fit. The yoke material may be knit smoothly and gives extra fullness over the shoulder blades where it is needed. For a custom-made look, back fullness should be pleated under the yoke rather than shirred. This also locates fullness at the points. Sleeve plackets should be deep and allow the cuffs to open flat for ironing. A small placket at the lower end of the shirt will make the sleeves and cuffs more comfortable when they are joined serves as a seam reinforcement. Don't overlook the buttons and buttonholes. Close fitting buttonholes feature close fitting stitching and fare back-stitched across the ends. Good quality buttons are smooth and clear with no chipping or chipping and they are firmly sewed to the fabric with thread ends securely fastened in the back. Of course, you need to know the correct size when you go shirt-shopping; adds Miss Kahabka.

Winter Care

Of Greens. Snow and ice of winter can pick off shrubs in your yard and garden. Joe Cox, extension specialist in landscape architecture at Michigan State University says damage often comes from the weight of the snow and ice. Branches are broken or bent, depriving them or causing them to split or break. Cox suggests you tend to your shrubs immediately after a snow storm. If you have not done them advance protection. Gently shake the snow from the branches with a broom. Low spreading evergreen shrubs can be protected by giving the branches some support ahead of the storm. Lay boughs or branches to support them. Cox suggests that snow can be used for this purpose also. If you shovel the walk, pile some of the snow under the branches to prevent them from bending to the ground. Another method often seen in northern Michigan is to use light, supporting braces, built from lath or other light-weight boards. These structures can be placed in front of the shrubs with the straps, and they can be used year after year. Upright-type plants can be protected by tying the spreading branches to the stem with a soft cloth. It may help to add the support of a stake in the center of such plants before they begin to bend. Bumps and bruises from children and dogs - romping through the yard are not kind to shrubs, so try to protect the plantings from this treatment.

Will Perform Saturday at Music Festival

This year, the Farmington secondary schools are going to be well represented in the District 4 Solo & Ensemble Festival sponsored by the Michigan School Band and Orchestra Association. The festival which will feature 812 events (solos, duets, trios, quartets, etc.) will be held at Wayne University this Saturday, Feb. 6. Farmington High School, band director at O. E. Duncel Jr., and Robert Zimmerman, band director at Farmington Junior and Senior High Schools will be working as room chairmen to assist with the operation of the festival. Participating as soloists or members of ensemble are: Farmington High School - Jacqueline Johnston, flute; Raymond Norton, Clarinet; Richard McKerracher, alto sax; William Hall, French Horn; Robert Woodward, trombone. Farmington Junior High School (Soloists - Lucinda Parsons, flute; Ann White, flute; Janet King, alto sax; Larry Lofgren, clarinet; Doris Fletcher, cornet; James Bird, drums; John Eiser, drums; Herbert Davis, drums; Cynthia Radding, piano; (Ensembles) flute trio: Rae Ann Butler, Carol Mowitz, Sue Sherlock; sax quartet - Janet King, JoAnn Markham, Hel Rogers, George Griffin; trombone duet, Bob Clement, Gary Pell. Duncel Jr. High soloists participants will be Gary Scott, trumpet; Craig Polter, clarinet; Lee Hundel, clarinet; James Hooper, baritone sax; Dany Uhl, tenor sax; Dan McCarthy, alto sax. Buy in Friendly Farmington)

Safety Commission Gives Tips To Drivers for Winter Months

"How are You Fixed For Chains?" might be asked by your dealer, but in this instance it is the State Safety Commission. Increasing numbers of accident cases, reports carry the phrase, "Car went out of control, ran off roadway, hit object, driver killed." Police, insurance companies and safety groups all want that driver and passengers alike should give themselves all the extra breaks they can get during the winter season. BRAKES SHOULD be in perfect order, well balanced and effective. Snow tires, both new and recaps are superior to conventional tires. Snow tires tests on snow and ice give the highest stopping ability to chains applied over tires. Snow tires come next. The National Safety Council's Committee on Winter Driving Hazards reports that an automobile equipped with reinforced tire chains, requires 77 feet of stop on glare ice. Snow tires, 174 feet, and Regular Tires, 195 feet. Also, automobiles equipped with reinforced tire chains, require 28 feet to stop on loose packed snow. Snow tires require 52 feet and Regular Tires 69 feet. These stopping distances are based on a loss of 20 percent of the stopping technique, even with the best tires or chains is still the key to control. Give yourself twice the room, make your decision farther ahead, don't drive at a speed beyond control, don't take chances. So much for the "don'ts." Do start ahead of time so you won't have to over-speed. When stopping on snow or ice, never slam on the brakes, pump them gently to a stop. If the rear wheels start to slip to the right, gently swing the front in the same direction. If your car slips off the edge of the road, the rear wheel will foot off the accelerator until you reach a level place where you can gently slip all four wheels back on the pavement. Expect the pavement on bridges to be icy, even when the rest of the road is not. Be especially alert where only patches of the road carry ice and snow. Abrupt changes in the friction coefficient of the pavement can upset the best equipped car. Melting and freezing in the early morning and early evening are a great source of accidents. The low headlight beam seems to be the best when driving in a snowfall. Avoid eye fatigue, particularly in this season. Speed too fast for the headlights can be disastrous. Wear sun glasses to ease the eyes when driving; discontinue driving if you are fatigued before retiring. Every driver is essentially responsible for what he does while behind the wheel. If you have "any" of the following conditions, you had a drink within a couple of hours, don't drive.

FARMINGTON HILLS

MRS. DAVID KRINGS GR. 6-0441. At the last meeting of the Farmington Hills Improvement Association, the following officers were elected to serve for the year: President, Robert Tipton; Vice President, Harry Luebs; Secretary, treasurer, Mrs. Lawrence Glingman. The restrictions committee is Don Chamberlain, Chairman; Lawrence Glingman, and Mrs. William Masecki. Cy Johnson was formed to work on some kind of suitable entrance signs for our subdivision. The following members will serve: William Masecki, Cy Johnson, Bob Tipton and Harry Luebs. Rather than have the officers elected next year by nomination, a committee was appointed. Mrs. Verne Beals, Mrs. Edwin Sempack and Mrs. David Krings will work on this. A committee and a bit of time to visit with our neighbors, was provided after the business meeting. A FAREWELL party was given for Ray Arvidson who is leaving his home on Glen Orchard, and will soon be moving. The party was held last Friday evening at the home of Mrs. Arvidson. Those present were the DeWes and Chamberlains; also of Donahy Drive and Glen Orchard Drive. Girl Scouts from Senior Wing Troop 258 enjoyed a guided tour of Metropolitan Air Port last Friday. Karen Masecki and Jill Slingerland were two of the girls from this area, who returned home on the hospital, having had a minor eye operation. Tom Dew is still sporting a cast on his arm, but returned home during the holidays. WILLIAM CARPENTER has accepted a new position in LaSalle, Indiana, with the National Housing, Inc. and is now leaving and looking for living quarters so that his family may join him shortly. This accounts for the "For Sale" sign in front of his home on Donahy Drive. Families in Farmington Hills have been invited to join with "Hills in Glen Orchard" and "Hills in Grandview" by the National Board of Fire Underwriters. (2) Be sure to follow manufacturer's directions for use. (3) Be sure the flame being heated always has fresh air supply. (4) Be sure to place the heater where it will not be bumped into or tripped over. Never move heaters. (5) Every lighted. (5) Place heaters level, well away from flammable materials. (6) Always shut off heater before retiring, or leaving the premises.

Portable Heaters

Portable heaters cause many of our more tragic home fires. If you must use a portable heater, observe the following: (1) Be sure that your heater has the approval of the National Board of Fire Underwriters. (2) Be sure to follow manufacturer's directions for use. (3) Be sure the flame being heated always has fresh air supply. (4) Be sure to place the heater where it will not be bumped into or tripped over. Never move heaters. (5) Every lighted. (5) Place heaters level, well away from flammable materials. (6) Always shut off heater before retiring, or leaving the premises.
