New insect spray with "systemic action" ... can't wash off!

Greenfield Insect Spray
8 oz. \$1.98
16 oz. \$2.98

Greenfield Rose and Ornamental Insect Spray
This all new spray is absorbed into the plant's "circulatory system." Gives long-lasting protection against sucking insects that ruin roses and ornamentals. Inside protection for tender new growth that's never been sprayed. Also kills chewing and sucking insects on contact. Safe for all ornamentals.

GROUND BREAKING

SCHOOLCRAFT COLLEGE—NEW EDUCATIONAL OPPORTUNITIES NOW ON THE WAY FOR NORTHWESTERN WAYNE COUNTY !!!!!

Come rain or shine, ground will be broken June 8 for another in the growing list of Michigan colleges. Schoolcraft's first four all-electric buildings will be open early next year, ready for the pressing business of meeting the area's growing educational needs.

The college will be on a year-round schedule with classes to be held between 7 a.m. and 11 p.m. It will be located on the 140-acre site bounded by Six Mile, Seven Mile, Haggerty and Newburgh Roads.

Schoolcraft will be one of the first colleges in the country to utilize fully the advantages of all-electric facilities—including electric heat and air conditioning. The architects, Eberle M. Smith Associates, Inc., of Detroit, eliminated the need for boiler rooms and furnaces by designing for flameless electric heat. The space saved will provide classroom facilities for 200 extra students.

Detroit Edison is proud of the role electricity will play at Schoolcraft College—Northwest Wayne County's new educational center.

DETROIT EDISON

Clarenceville School Board Trustee Candidates

There are four candidates vying for the two seats available on the Clarenceville School District Board of Education. The eligible voters in the Clarenceville School District will decide on Monday, June 10, which of the two candidates will serve the four year terms as Board Trustees.

In the interests of providing voters with an opportunity to familiarize themselves with each candidate before next Monday's School Election, the Enterprise has compiled information made available from questionnaires sent to all four who filed in the race.

Two questions were asked each candidate and their respective answers follow the general biographical data. The two questions put to the candidates were:

- 1) State your feelings regarding extension of the school year (perhaps to an 11-month program) to provide greater utilization of school facilities.
- 2) If finances did not permit continuance of the present school program at some future date, what subjects or special programs would you recommend eliminating? Indicate at least three in order of preference.

The four candidates for your consideration are the two incumbents whose terms expire June 30 with the end of the fiscal year 1962-63. Samuel J. Prisk and Thomas C. Wilson, and two newcomers, Donald A. Hayden and Richard J. Bayles. The Enterprise received information on all but the latter aspirant.

D. A. Hayden

Donald A. Hayden, 32, lives with his wife, Shirley, and their four children, ranging in age from 10 months to 13 years, at

30441 Bretton Road in Livonia. He has been a resident of the School District for the past two years, previously residing at 16718 Sunderland in Detroit for 20 years.

"I have been intimately connected with the Clarenceville School District for five years," Hayden says. "I graduated from Redford High School in 1948 and from Michigan State University in 1954, with a degree in forestry. In 1953 I received a teaching certificate under Wayne State and will receive a Master of Education with emphasis in administration this June," Hayden says of his educational background.

He is employed as an elementary school teacher with the Clarenceville District Schools, under contract until June 14. He plans to teach in the Detroit school system beginning next fall having signed a contract which becomes effective in September of this year.

Hayden is a member of the Michigan Education Association, president of the Grandview PTA, and neighborhood commissioner of the Boy Scouts of America. He lists no previous governmental experience. As a parent and taxpayer as well as a former employee of the Clarenceville School District, Hayden feels he is in a position to know and understand the needs of the Clarenceville Public School from many sides. Hayden feels his training in school administration as well as his experience in the District school system gives him the necessary qualification for the office.

Here is how he answered the Enterprise questions:

- 1) An 11 month school program could become a reality. Long summer vacations are a hold-over from the days when our country was largely agricultural and children were needed to work on the farms during the summer.
- Children and teachers would require a period of time to adjust to such a system so I feel that if it was instituted it should be gradual. Many of our schools lack facilities to be operated during the extreme hot months so some expense in conversion and change of design might be necessary.

The public must be willing to accept such a program before it could become a reality.

- 2) In case of curtailments in the school program I feel that the use of school facilities by outside groups would have to be eliminated first, followed by non-academic school events of all types.

This would include plays, con-

certs, sports, etc. In the event that these moves did not create the needed economy I would prefer half (½) day sessions before I cut any of the school subjects.

The half day sessions could eliminate the lunch program and perhaps result in a small saving, but I feel this saving would be negligible.

Samuel J. Prisk

Samuel J. Prisk is a member of the Clarenceville School Board (Trustee) lives with his wife, Janet, and their three children, aged 12, 9 and 4, at 20209 Gillman Road in Livonia. He has been a resident of the Clarenceville School District for the past 16 years. His last previous residence was at 21416 Collingham, where he lived for nine years, while still single.

Prisk is a graduate of Farmington Senior High School, attended Wayne State University, received a D. S. degree from Washington University in 1947 and has done post-graduate work at the University of Detroit. He is self-employed as a dentist and has been in practice for the past 14 years. His office is presently located at 26339 Grand River.

Prisk is a member of the Detroit District Dental Society, Michigan State Dental Association, the Boy Scouts of America, assistant district commissioner and training chairman, and a scoutmaster. He is also a member of the US Army Reserve and active in PTA.

He has served on the Clarenceville Board of Education since July 1, 1959.

His answers to the Enterprise questions:

- 1) Before any extension of the school year it would be necessary to study and revise curricula so that the new program would not be just a watered down, diluted version. Many textbook changes would be advisable, to take advantage of the time increase through deeper subject penetration.

A major problem would be an expanded budget due to increased teacher salaries, clerical, custodial and maintenance costs. In most districts, now operating very tightly, this would almost certainly mean tax increases for the already burdened taxpayer.

Children and families need summer freedoms.

Continued improvements in curriculums and teaching methods would be more effective.

- 2) This appears to be a coy way of asking what I feel are the least essential in our educational program.

Prior to any curtailment of our present program, which certainly needs to be expended as funds permit, I would look elsewhere for ways to conserve spending; perhaps in administrative costs, maintenance, custodial, transportation or clerical areas.

Since the primary functions of a public school system are academic and partial vocational training of children, if absolutely necessary, I would eliminate non-self sustaining varsity athletic programs. Secondly, any normally freshman college subjects, such as psychology, third, elementary physical education or art.

Thos. C. Wilson

Thomas C. Wilson, 57, (incumbent Clarenceville School Board Trustee, serving as secretary) lives with his wife, Jean, and three children, aged 25, 19, and 13. They make their home at 18317 St. Francis in Livonia and have been residents of the School District for the past 38 years. They previously resided in Detroit for a period of 17 years.

Wilson is employed as a laboratory supervisor at the Hydramin Engineering Company. He has held the post for the past three years.

He is a member of the American Society of Metals, American Electroplaters Society and the American Water Works Association. He has served on the Clarenceville Board of Education for the past four years.

Here are his answers to the Enterprise questions:

- 1) At present I do not know what value this would have for the children. We must remember we are dealing with elementary and secondary level children. Are they ready for such a program? What about the socio-economic factors involved (family vacations)? What about teachers who have planned to return to school for graduate work during the summer, and finally what would the extension cost? Approximately 10 percent of the present operating budget added.

At present the Clarenceville Board of Education provides for those who want it; summer courses in remedial reading, mathematics, music and driver education, at all levels. The pros and cons would have to be evaluated in all phases.

- 2) This is one that would have to be studied by the entire Board very carefully. Some of the areas are non-sustaining; varsity athletics, physical education, art at elementary levels. Reduction of bus transportation. Reduction of some areas in administrative and custodial levels. Again I state that there would have to be a comprehensive study made.

No biographical data was submitted by Richard J. Bayles of 22046 Wether in Livonia, the fourth candidate who will appear on the June 10 ballot in the Clarenceville School Election.

Appointed College Magazine Editor

David L. Frederick, son of Mr. and Mrs. LeRoy O. Frederick, 34156 Banbury St., Farmington, has been appointed 1963-64 editor of Sounds, campus literary magazine at Wittenberg University.

Mr. Frederick has been active in speech and drama work at Wittenberg.

Michigan is the nation's No. 1 producer of potato chips.

Eighty-seven percent of all types of industry are found within Michigan.

The state bird of Michigan is the Robin.

Bill Conroy Does Too! Phone GR. 4-3511

Michigan apples in 1962 were sold as far south as the Gulf of Mexico, all the way from San Diego to Nome on the west coast, airlifted into remote mining and lumber camps in northern Canada, and even exported to Europe.

Michigan's most important industry is the manufacture of motor vehicles and equipment. Of all U.S. workers in this industry 38.8 are employed in Michigan.
