## TO THOSE LIVING IN THE COMMUNITIES SERVED BY DETROIT EDISON

As you grow and prosper, so do we. The nature of our business makes us very much a part of the 67 cities, 76 villages, 214 townships and 258 other communities that make up Southeastern Michigan.

It is mutually advantageous for us to encourage farmers to follow good agricultural practices, for example. Electrically driven machinery, so vital in combating the cost-price squeeze, is fast turning farms into food factories and there is much to learn in the process. The successful farmer of the future will be the one who best knows how to evaluate and use these "wired hands."

In behalf of business, we're constantly searching for new and improved ways to put versatile electric energy to work. This helps make our recommendations to our industrial and commercial customers more valuable and meaningful.

To aid in bringing new business enterprises into this area is another goal of ours. We help firms in search of new locations to find the best sites. Of greater long-range importance, we help communities make themselves more attractive to industrial newcomers. One way of doing so is by assisting in the research and work which lead to community planning and to the establishment of industrial development committees.

As you grow and prosper, so do we. We seek always to be staunch and enthusiastic boosters of the area and the people we serve.

Sincerely,

*Walker L. Cisler*
