POST OFFICE

"Nearly all those Wagons and Buggies are Studebakers"

Every year over one hundred thousand Studebaker vehicles are sold.

This tells you what the farmers of the country think of the Studebaker wagons.

This appreciation has been constantly growing for sixty years.

This appreciation has been earned by the determination of Studebaker to produce an honestly built wagon, that will do a full day's work and keep on doing it, and not to build a cheap one.

The man who buys the Studebaker gets all the improvements gained by the experience of two generations of wagon builders.

The Epworth League will meet last Monday evening at 7:30 o'clock in the town hall. Do not fail to attend. The last meeting of the Epworth League was held last Monday evening.  
I want to see the Epworth League service. The pastor is to speak on the subject, "What is a Man?" Always look for the want list.  
Dr. Allen, the district superintendent held quarterly meeting on Tuesday of this week and important business was transacted.  
The program for Sunday: Morning subject, "The Influence of Christ." Evening subject, "What is a Man?" A mixed quartette will sing and we will have some selections on the Victrola, kindly promised by Mr. Parnel.  
Watch out for the Epworth League. "Something doing."

**PEOPLE WHO SKIPPED**  
Fifty Miles From New York, City Lives Primitive Race of Mountaineers.  
A journey in search of a primitive race of mountaineers living within fifty miles of New York city might seem to be an impossible quest, remarks the New York Evening Post. Yet it is true that less than fifty miles away there exists a people and a civilization—among the several hundreds who compose it—as backward in all conditions of life as the mountaineers, the "covites" and poor "white trash" of the most inaccessible regions in Virginia and the Carolinas and in Tennessee. These people, for the most part in the Ramapo mountains, are in nearly every respect precisely like the mountaineer type in the south, except for the most remarkable fact that they dwell within an hour's journey of New York.  
Twice in the last month attention has been called to the Ramapo mountaineers. Recently it was announced that Mrs. Edward H. Harriman, whose estate is situated at Arden in the Ramapos, had given \$1,000 for the employment of a social worker who should go among these people in Orange, Rockland and Passaic counties and work to teach them the simpler elements of hygiene, in order to awaken in them some understanding of the things which their lives did not possess.  
Miss Florence Smith of the Cold Spring Harbor training school was appointed to the work—mission work, as it is generally called in the south—and has begun her task, but has not yet gone to the remotest districts. What has been found already of the primitive conditions is ample evidence of the need of such an endeavor.

**What Three Bushels More to the Acre Means**

**I**IGHT years ago the farmers in a central state averaged crops that ran three bushels less to the acre than they now get. Suppose each acre of farm land in the country were so tended that it produced an increase equal to that of this state. How much more money would you have with which to buy the luxuries of life that you earn and deserve? Your share in this prosperity depends entirely upon yourself. The first step is to fertilize your land properly with manure spread by an

**I H C Manure Spreader**

The spreader that does its work as it should must have many excellent mechanical features. The apron should move without jerking; the beater should meet the load at exactly the right point to pulverize the manure without too greatly increasing the draft of the machine; the speed changes of the apron should be positive. All these features are provided for in the construction of I H C spreaders.  
I H C spreaders are made in low styles which are not too low for use in deep mud or snow, narrow and wide, with both rear and endless aprons, for use under all conditions. The rear axle is located well under the box, instead of at the rear. Placed in that position (under the box) it carries over 70 per cent of the load and insures ample tractive power.

Heleh, five year old daughter of Mr. and Mrs. Cloyes Steele, was taken to Harper hospital last Friday, suffering from a complication of diseases. On Wednesday she was operated upon for pleurisy and later will undergo an operation for appendicitis. She is getting along nicely.  
Every man who has an ounce of red blood in his veins should get the Saturday ball games and yell like a Comanche. It's the best tonic in the world and will do more towards clearing out the humar system than all the sarsaparilla that ever grew. Take the wife along and turn the kids loose. They'll get there alone.  
Village Clerk Perry Prindle asks the Enterprise to call attention to the State Spring Clean up Day, May 15, and to urge a compliance with the proclamation of the governor. A concerted effort on the part of the villagers will do much to keep the town in a sanitary condition as well as improve its appearance.

A man living at Auburn, New York, had a severe attack of kidney and bladder trouble. Being a working man, not wanting to lose time, he cured himself completely by using Foley Kidney Pills. A year later he says: "It is a pleasure to report that the cure was permanent." His name is J. A. Farmer. Sold by T. H. McGee.
