TRENA M. QUINN City Clerk Published April 23, May 14, 1964

you won't believe it 'til you... TURN the steering wheel on Bolens new riding mower. Ordinary riding mowers have four wheels on a one-piece frame. Turning requires a "wide sweep," or a series of "back-ups" to make square corners. Bolens new Lawn Keeper is a riding mower with a two-piece frame. And the frame does the turning! Turn the steering wheel and this one pivots within a 14-inch radius. Cuts grass forward of front wheels for smoother lawns. Engine and exhaust fumes to rear of operator... where they belong!
