Extend Mortgage To Cover Fixup

If you are buying an older home which needs repair work and modernization, explore the possibility of stretching the mortgage loan on the house to cover the cost of the improvements.

You can get the kitchen of your dreams earlier and with less strain on your family's finances, by extending the mortgage loan. Since architect and engineer fees at the outset is sufficient to pay for the improvements. The alternative is a supplementary loan, which can prove burdensome later.

Very often a mortgage can be used to include the cost of new kitchen cabinets, sink, floor, lighting and even major appliances, such as a built-in electric dishwasher.
