Wood Framing Still Superior For Homes; Builders Prove It

home building, the magazine added.
"It's time for the engineers and theorists to wake up to what builders have known all along; the time-honored system of a wood frame faced with akins and alliting on a masonry foundation is a very good system. This is not to say that the old way can't be timproved," the editors opined, "but home builders aren't sticking to the lold ways out of sheer obstituacy. They're doing it because the old way force advantages that no new system has yet come close to equalling. Specifically:

Ilours still are being built. The sold way of building the same way as they were a housing way as they were a building to the common the control of the common time. The control of a magazine, read widely two representative home building products people, posed this question. Its answer is of equal interest to home owners and home buyers.

"Were still building bouses in the same old way," says the magazine, because under to days conditions, there's no better way." The wealth of new building, the magazine home building, the magazine to treat the magazine, because under to days conditions, there's no better way." The wealth of new better new building systems have not yet fersatically change and theorists to wake up to what builders have known all along; the time-boonered system of a wood frame faced with sixts and all time on a masory foundation is a very good system indeed.

This is not be say that the other way to building the mild and control of the work of the control of the mild way to building the magazine stated. The old way of building the magazine taked to the mild the said of the mild the said of the mild. It is not be used to be a support of the said of the mild. The old way of building the magazine taked the said of the control of the said of the said of the mild. The said of the said of the said of the mild. The said way to building the magazine taked the said of the said of the mild. The said of the s

hemlock when a creamy-deign
color is desired, western red
cedar or ponderosa pine for
deeper coloring.

Houses still are being built e same way as they were a sundred years ago. Well and a still the cheepest way of builds finish, and, if properly rared for recent housing trained and the properly rared for recent housing trained to the properly that the still the cheepest way of build finish, and, if properly rared for recent housing trained to properly the control of the properly rared for recent housing the magazine showed that earlier and building products people, posed this section Its answer is of equal terest to home owners and one buyers.

"We're still building bouses where in obeing the same old way," says the system. Partition costs varied from 60 cents to 50 cents a square foot in a wood frame system. Partition costs varied with wood framing and akins. "These are hard figures to be easily created windows or way a conditions, there's no bein the same of the same way of building is still the casiest and most flexible way." We magazine continued. "The basic reason is that buyer is premitting way to building is the radicional building materials and when the same productions are the same way to be a support of the same and the sa

plans.

Buyers, it declated, "no longer want the most space for the
least money, as they did ten
years ago. They want individuality — design and plans
tailored to their personal wants.
And the old way of building,
with its great flexibility, is the cheapest and easiest way to provide this individuality."
