the date of original retail purchase, whichever comes first.
The repair or replacement of defective parts under this warranty will be made by the dealer without charge for parts and labor.
This is the third increase in warranty coverage announced by General Motors in the nast six years. In

mounced by General Motors in he past six years. In Cotober, 1960. GM announced a 12-month or 12-000-mile warranty on all parts of the vehicle except tires. In September, 1962. GM increased this owner protection effective with he introduction of 1963 models to 24 months or 24,000 miles, whichever came first, on all parts of the vehicle except tires.

The current program is designed to give the best coverage to all customers of GM products.

On The Lawn By Larry Lawrence

Washington, D.C. sees many world gatherings, but this is the first time that it has played host to the world's horticulturists. They are meeting there for their XVII International Horticulture

meeting there for their XVII International Horticul 1u re Congress and, whom their sessions are concluded, those whose specialty is turf, will pack their blags for a visit The Congress and the matter of the contrast, coming, from the nation's capital to the quiet, tree-lined streets of a small town, will be draftatic. But the change should be instructive as well as refreshing, For just as Washington is now considered as the world's diplomatic hub, so Marysville, small as it may be, is often called the gravat capital of the world. The visitors, who will be the guests of Scotts, the lawn people, will be able to inspect a larger acreage of turf grass under test than exists anywhere else. And they will get a close look at the kind of research work that conninues to transform the technology of lawn keeping.

tinues to transform the tech-nology of lawn keeping.

When experts come to this country to observe our auto factories and nuclear power plants, that is to be expected. But when they come to see our grass, this is something new and encouraging. It sug-gests that the US isn't quite industrial wasteland that it is sometimes painted and that there are other green things here besides money.

second home in resort areas becoming "more of a necessity than a luxury."

ot a necessity than a Juxury.

6. The typical purchaser will continue to improve his living standdards with new and and larger homes.

7. Industry will continue to expand its plant facilities and relocations will continue for some time.

8. More and more people will be investing in properties as a hedge against further inflation.

In Pointer's opinion, today is a good time to purchase real exists if the hurer in expanded and the properties against further inflation.

The continuation of the highway program on both national and state levels will bring communities even clos-er together.

In Pointer's opinion, today is a good time to purchase real estate if the buyer intends to take advantage of a booming market.

"In order to handle the increased business volume, it will be necessary to have more well-trained people in the real estate business," he adds.

"However, the standards for new people in real estate will likewise be rising in most areas. In order to take advantage of the opportunities the field offers, the person interested in real estate as a career should have a sound education background." communities even close to gether.

2. Recent changes in the Federal agricultural program will result in larger farms with more land devoted to agriculture.

3. The effect of the World War II baby boom will result in a sharp interease in new family formations and deemands for housing.

4. While new residential construction is down now, it will expand beyond any levels previously reached.

5. The interease in leisure with time will see a change in living habits with a
