Desperate Remedy.
From the roof of a building the stranger looked down upon a park whose spare grass, seragay shrubbery and stunted trees were almost trampled out of sight by a human mob that surged round a speaker's platform in the middle of the park.
"What's up?" said the stranger. "A suffragist riot!"
"Worse than that," said the guide. "The park grass has been in a bad way for several months, and a local politician has called a mass meeting of the citizens to discuss plans for saving it."

OF PLAIN VEGETABLES

REMARKABLY PRETTY TABLE DECORATIONS MAY BE MADE.

Call Only for the Exercise of a Little Ingenuity, and the Quality of the Food is Not in the Least Impaired—Some Examples.

There are many artificial ways to make lovely decorations, but in the state of vegetable flowers we can show a simple way of making our everyday meals more appetizing and still not interfere with the palatable part of the dishes we prepare. These things will appeal to every one who may be interested in making home dishes with pretty garnishes. For instance, the small vegetable can be cut into flowers, as follows:
Beets—Cut beets in fancy shapes; they make a pretty garnish for any salad; cut as cups to serve salad in; carries out the red color scheme; sliced and cut like hearts carries out the vegetable idea.

Cabbage—Cut cabbage head like flower; take out center and make it to stay and serve in head. You can also serve hot cauliflower. Cut cauliflower head or any other vegetable salad.
Cantaloupes—Cut cantaloupe in half, scallop, fill with green grapes and serve as first course; can also serve ice cream in the halves.
Celery—Cut celery about 3 inches long, slash each end with scissors and stand in ice-cold water until it curls; then serve on lettuce leaves with mayonnaise; this makes a good relish.

Lettuce—Cups are pretty to serve salad in. Use fresh, crisp lettuce.
Potatoes—Boil and cream well by running through ricer; season with salt; when a little warm, color delicately; put into tube, and make into roses, sweet peas, etc., or mold into morning glories or nests and eggs. Make into cups large enough to hold raw egg, run in stove, until egg is cooked, and serve around steak. Make mound, serve chops around it, and sprinkle with peas at base.
Radishes—Small red radishes can be cut to look like carnations or tulips; they make a beautiful garnish for aspic in green, and are pretty on lettuce with salad; cut in slices; cut with celery; they are nice to serve in peppers with a taste of onion.

Tomatoes—Cut tomatoes like pond lilies; serve with slices of cucumbers, as a salad. Cut at cups, take out center, mix with cucumber and celery, and serve with mayonnaise; these cups can also be used for sweetbreads and chicken. Serve in slices, with cottage cheese between. Cut up tomatoes in half and put these flowers in center; serve on lettuce leaves.

Vegetable Soup.
A good vegetable soup is made in this way: Brown in three tablespoons of butter in a saucepan a sliced onion, a sliced carrot, a sliced tomato, a sliced turnip, a stick of celery and a parsnip. After they have browned add slowly for 15 minutes, add a quart and a pint of cold water and three or four tomatoes, two or three more stalks of celery, some parsley and a carrot, and simmer gently for an hour. Then add three tablespoons of bread crumbs and rub the soup through a strainer. Season well with pepper and salt, and after it is removed from the fire add a couple of tablespoons of butter. Serve with finely minced parsley sprinkled over the top and pass croûtons with it.

Cold Potatoes.
In summer we will find it very convenient to have cold-bottled potatoes for use in potato salad or for frying for breakfast or lunch or for creamed potatoes.
We now find bacon and eggs so agreeable and also so easy to cook with little heating of the house that we can easily dispose of the cold potatoes by frying in bacon fat. This will save using of meat while giving a good tendency to balance the lighter diet so desirable in hot weather.

To Keep Mattresses Clean.
Mattresses become soiled very easy. A good way to keep them clean is to get unbleached cloth, the cheap kind is just as good and not so heavy to wash. Make a cover of just large enough to fit the mattress, so it cannot wrinkle.
Sew it across the head, leaving the foot open. Slip it on and draw it down across the head and just here it hangs down to hold it in place. When it becomes soiled take it off, wash, iron, and replace. Cool, clean and sweet.

Planked Beefsteak.
Take two pounds of best round steak, pound it well after sitting one-half cup flour over it; slice six onions over the steak, salt and pepper, wash, shake a dash of red pepper over also; fill dripping pan half full of cold water and place in a hot oven to bake one hour; do not turn the meat. Serve from the dish it was baked in.

About Potatoes.
Put the potatoes to soak a little while with a small piece of common soda in the water, and you will find they are much easier to scrape and do not soil the fingers.
For Brick Floors.
A red-brick kitchen floor will keep beautifully red and clean if instead of soap's drop of paraffin oil is used in the water. This mixture removes all the excess marks.

Want Changeable Dresser!
At the recent International Congress of Applied Chemistry in London one of the most celebrated lecturers, Giacomo Ciamician, predicted that women of the future will not be contented with a dress which remains constantly of one color, but will demand colors that change in harmony with their surroundings.
Thus the color of the apparel may be changed without changing the dress. Passing from darkness to light the color would brighten, thus conforming automatically to the environment—the last word in fashion for the future.
The prediction will come true as soon as chemists learn to understand better what are called "phototropic colors," or colors that change with the intensity of the light upon them in men's wear; this might mean that the light-colored suit of the bright summer day would be transformed into a dark suit at night.

Queer Struggle.
"There is one extremely odd thing which happens often in summer."
"What is it?"
"That there should be such a hot time over the price of ice."

Up Against It.
"That woodpecker may be persistent, but I think he's beaten this time."
"What's he trying to do?"
"Drill a hole into an iron trolley pole."

Practical Virtues.
"How did that never-do-well manage to live?"
"In hope that if he inspired enough faith he might live on charity."
"What is it?"
"In hope that if he inspired enough faith he might live on charity."

Getting Close to Nature.
"This is an interesting moving picture of frog culture."
"Yes, and if it were a talking moving picture, we might even hear the frog's creek."
Not Disorderly.
"So you have been to the art exhibit?"
"Yes, and I found several Whistlers there."

Friendly Tip.
Ragman—Any old bottles today, mum?
Woman—No, but you might try Mr. Soakem's, next door; his wife's coming back from the seashore tomorrow.
More than 30,000 school children in Los Angeles are studying gardening.

First American Cigar Factory.
The first American cigar factory was established in Connecticut in 1810. By 1825 there were numerous small cigar factories in Connecticut, Kentucky, Massachusetts, Pennsylvania, Ohio, New York, Maryland and Virginia. The first tax levied on domestic cigars and other tobacco products was laid under the internal revenue law of 1862, which was a war revenue measure.

Directs Expenditures.
"Who's that impressive-looking woman over yonder?"
"That's Mrs. Packem! She's a remarkably strong-minded woman, and they do say that she commands a very large salary."
"How does she earn it?"
"She doesn't earn it. Her husband earns it, and she commands it!"—Puck.

Mosquitoes seem to be troubled with chronic insomnia.

Young Man Took Warning.
"Charles," said a sharp voiced woman to her husband in a railway car, "do you know that you and I once had a romance in a railway car?"
"Never heard of it," replied Charles, in a subdued tone.
"I thought you had," but don't you remember it was that pair of slippers I presented to you the Christmas before we were married that led to our union? You remember how nicely they fitted, don't you? Well, Charles, one day when we were going to a picnic you had your feet up on a seat, and when you weren't looking I took your measure. But for that pair of slippers I don't believe we'd ever been married."

Small Souls.
Upon Sinclair was talking about certain millionaire malefactors whose crimes always went unpunished.
"It's hard to understand," said Mr. Sinclair, "how these men escape retribution unless it be, indeed, that they're too small for the meshes of the net."

How He Would Have Them.
How will you have your eggs cooked?" asked the waiter.
"Make any difference in the cost of 'em?" Inquired the cautious customer with the brimless hat and the ragged beard.
"No."
"Then cook them on the top of a slice of ham," said the customer, greatly relieved.

The Kind You Have Always Bought.
THIS is the caution applied to the public announcement of Castoria that has been manufactured under the supervision of Chas. H. Fletcher for over 80 years—the genuine Castoria. We respectfully call the attention of fathers and mothers when purchasing Castoria to see that the wrapper bears his signature in black. When the wrapper bears the same signature printed on both sides of the bottle in red. Parents who have used Castoria for their little ones in the past years need no warning against counterfeiters and imitations, but our present duty is to call the attention of the younger generation to the great danger of introducing into their families spurious medicine.
It is to be regretted that there are people who are now engaged in the nefarious business of putting up and selling all sorts of substitutes, or what should more properly be termed counterfeit, for medicinal preparations not only for adults, but worse yet, for children's medicines. It therefore devolves on the mother to scrutinize closely what she gives her child. Adults can do for themselves, but the child has to rely on the mother's watchfulness.
Genuine Castoria always bears the signature of *Chas. H. Fletcher*

Important Measures Made Law.
Among the notable advances in the legislative enactments of this year are the (tuberculosis) registration law of Colorado; laws providing for subsidies to local hospitals in Minnesota and Wisconsin, an act providing for the establishment of county hospitals in Indiana, and the establishment of state bureaus for the prevention of tuberculosis in Ohio and California.

Handsome Is as Handsome Does.

"I don't care, let 'em rip."

Post Toasties

Are mighty handy to have in the house as well as mighty good to eat direct from the package with cream.

Besides being the most delicious ready cooked cereal food made of corn these crisp, crinkly flakes serve many another useful purpose in cooking.

Rolled into crumbs and used as an outer dressing for breaded veal, lamb, chicken, pork or ham; they give a zest to the 'fry' that makes the home folks ask for more.

Softened with milk and used with usual spicing and fixing as an inside dressing for baked fish or fowl they impart a delicate flavor to the finished dish, reminding of the chestnut fillings that cast a halo around the days of old-time cooking.

Post Toasties are sold by Grocers everywhere—and everywhere folks who relish good things to eat, appreciate the delicate Indian Corn flavor that makes
