 New Machine Speeds Bleaching & Tinting

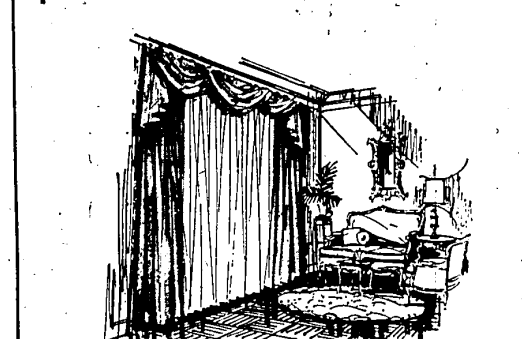

Jean's Bel-Aire Beauty Salon is one of the first salons in the Farmington area to install the new Riffing Accelomatic Speed Processing Machine. We know that you, our patrons, will be thrilled with the valuable time saved by this revolutionary invention. Women may soon be changing the color of their hair in almost the same time it takes to put on a wig, and that isn't too much of an exaggeration. The new invention has reduced the hair coloring process to a tenth of the normal hair coloring time. Many women who have here-to-for resisted Permanent Hair Coloring due to the lengthy time involved will have a change of heart when they have once "experienced" using the new "Speed Processing Machine." This machine is not to be confused with steamers types of machines which use a combination of heat and steam.

The Accelomatic Speed Processing Machine is completely new. It is as comfortable as a hair dryer — and you are under it a far less length of time. It will not change your usual bleach, toning, tinting or frosting results in any way. The machine does nothing more than "speed up" developing time. Your formula, products and application remain the same. Your operator and hair colorist is the "artist" — not the machine. So New! So Exciting! Now, with this marvelous machine, in an unheard of short time, a bleach and toned customer can be completed — in and out of Jean's Beauty Shop — in One Hour and Forty-Five Minutes! We are certain you will find this new speed and service of great convenience in your busy days ahead. May we continue to serve you. Sincerely, Jean's Bel-Aire and Staff.
