FLOOD CONDITIONS at Dunckel Junior High were discussed. Engineers are contemplating the building of dams in the 400 acre parcel at the northern end of the township to try to stop the flooding, it was learned by Neal in his study of the situation.

The board agreed to have its engineering firm look over the problem area and suggest a solution to be put into effect before school re-convenes in the fall.
Expenditures in the amount of \$1,902,555.55 were approved. Herbert Neal questioned what he considered a large expenditure for Polaroid film. It was explained that this is used in the Title I program for making audio-visual aids and encouragement of children with reading problems. They take pictures home with them to indicate their rate of progress, this in turn is an added impetus to their reading headway.
Approval was given for an expenditure not to exceed \$3,750 for mechanical work necessary in additional drainage at the Fairview School site.
