SECTION B

Board Of Ed. Told Motor Skills

At their meeting on Monday evening, Board of Education members heard a presentation of the pilot program which Farmington school district has undertaken in the field of Percussion and Motor Development. Eleanor Snyder, a physical education teacher at Ten Mile School works with classes up to third grade on correlating their perceptual and motor development and described the procedures.

Four areas of activity are emphasized—Posture and Balance, Laterality (knowing "inside" which side of the body is which) Directionality (converting this knowledge to the outside), and Body Image (realizing how much space the body occupies). Many activities contribute to developing these, and are put to use in special classes.

As Miss Minnie Zielke, Coordinator of Elementary Education, explained, "Too often parents don't realize the importance of coordination; they just want Johnny to learn to read, but there is a relationship between brain development and these motor abilities."

Farmington District, it was pointed out during the presentation is most fortunate. Fewer than 45 per cent of the country's children have any kindergarten experience, and 70 per cent of elementary school graduates do not have a physical education program in spite of all the recent emphasis from Washington on physical training.

Those engaged in the motor development processes do not claim that they are a cure-all for all slow children, but can

estimate that 15 to 20 per cent of the children will be helped and these are the ones who really stand in need of it.

Marinus VanAmeide, assistant superintendent, was extremely pleased when the program took shape because it proves that the physical education people have a great contribution to make to the instructional program; they are not "just muscle builders."

A CIVIL DEFENSE CLASS in first aid is being conducted at East Junior High School on Wednesday evenings with Nurse Donna Connerly as its instructor (shown here in uniform). On her right is Civil Defense Coordinator

Evelyn Rouse. Members of City and Township police forces are attending the class together with other interested citizens.

Lower Death Rate In Highway Mishaps

"An encouraging Michigan highway mystery" which began in June is continuing this fall, Automobile Club of Michigan's General Manager Fred N. Rehm reports.

"A 25 per cent increase in traffic deaths from February through May over 1965 was cut to 12 per cent in June," Rehm said. "From July through October 9 there has been a nine per cent decrease compared to 1965. This is in the face of a two to five per cent increase in traffic volume, Michigan's biggest tourist season in history, and steady increases in fatalities across the nation."

This statement appears in a 14-page report "Portrait of a Holiday — Part 2," just released by Auto Club after an on-the-spot investigation of each Labor Day weekend death in Michigan, and a summary of findings of Memorial and July 4 weekends.

"Nobody can say for sure what has caused this decrease in deaths since June," Rehm said. "But part of it must be due to the largest amount of safety publicity in the press in history this summer, plus increased emphasis on safety by police and motorists themselves."

Six of the 39 persons who died last Day weekend on Michigan highways might be alive if their cars had been equipped with safety items which are standard on the 1967 models, and they had used them, Rehm added.

"There is no way of knowing for sure, but one driver might have been saved by a collapsible steering wheel," said Rehm. "Add five others might have lived if they'd

had and worn seat belts. Certainly many would have survived with shoulder harnesses."

"But when a car traveling over 75 miles an hour hits another car or a fixed object, no safety device known could save anyone," Rehm said.

Two cars on Labor Day weekend were traveling over 100 miles an hour and three others 75 miles an hour or more, when fatal impacts took place. Almost half the drivers involved had these characteristics in common: male under age 30, single-car mishap, driving too fast, drinking too much, not wearing seat belts, close to home, not on holiday.

Most of the findings from similar studies after Memorial (43 deaths) and July 4 (27 deaths) weekends were confirmed in this study. They include:

• No obvious mechanical defects were found in any of the vehicles involved in fatal crashes. None has been found in any of the 100 deaths. Three cars had poor tires which could not have directly caused the accident. Average age of vehicles involved was 8.4 years. On the other holidays it was 3.2 years and 3.8 years respectively.

• The 10 worst drivers involved had an average of 182 points according to their driving records in the Secretary of State's office (in most cases this includes more than two years). This compares with 26.9 on Memorial weekend and 16 on July 4 weekend. Even 10 is much worse than the average driver ever gets. On Labor Day weekend, one driver had 23 points and eight convictions, seven for speeding.

Ceremonies Held At Industrial Park

M. Gargarian Guest Soloist

Miriam Gargarian, student of Boris Maximovich, began to study the piano at the age of five and gave her first private recital at the age of seven. Her awards include several scholarships to Interlochen National Music Camp, a scholarship to the Interlochen Arts Academy, and a citation from the State of Michigan.

In 1963 she won first prize in the N. E. T. or Memorial Piano Contest and was guest soloist with the Detroit Symphony Orchestra. She was the youngest ever to have been given that honor. Miss Gargarian has been soloist on numerous occasions with orchestras in Michigan and Indiana.

October 23, Miss Gargarian was the soloist with the Wayne State University Orchestra for the opening session of the Girl Scout National Council. Having won first prize in the Center Symphony Piano Contest, Miss Gargarian will be the guest soloist with that orchestra under the direction of Julius Chiles, November 15.

Miss Gargarian is a junior in the College of Liberal Arts at Wayne State University and lives at 2540 Ridgewood Dr., Farmington.

Tracking System In space terminology, a minitrack is a system for tracking artificial satellites by means of radio waves transmitted from the vehicle itself.

Institute Slated Nov. 2 At U-M

The 37th annual Parent Education Institute, expected to attract parents and teachers from all across the state, will take place November 2 at the University of Michigan.

Attorney J. B. James George, Jr., professor of law at Michigan, will deliver the first address at 9:45 a.m. on November 2 on the subject, "What Are The Civil Rights of Children."

President David H. Pont, of Westernan Community College, will follow with a look at "What's Ahead Vocationally For Children."

The Institute will resume after lunch as Dr. Stuart M. Finch, chief of the U-M Children's Psychiatric Service, discusses "Coping With The Responsibilities Of Parenthood."

A postscript will be delivered by Otto Yntema, director of the Division of Field Services at Western Michigan University.

The Institute is sponsored by the U-M Extension Service and The Michigan Congress of Parents and Teachers.

square feet; Posa-Cut, Inc. — 8,000 square feet; Borch, Inc. — 8,000 square feet; and Omni Spectra — 25,000 square feet.

In addition, the following firms have purchased property and have scheduled construction starts for either late this year or early 1967: Multi-Elmac — 50,000 square feet; H.M.L. Industries — 35,000 square feet; Solar Industries — 12,000 square feet; Whitlock, Inc. — 50,000 square feet; Eaton, Yale & Towne — 72,000 square feet; Gancia-Cole — 38,000 square feet; Howell-Penners — 8,000 square feet; and Johnson Die & Engineering — 25,000 square feet.

The 106-acre site, according to Farmington Township Supervisor Curt Hall, marks the initial use of a 700-acre parcel zoned for use as an industrial park.

Thompson-Brown executive vice president William W. Bowman explained that initial development will include, in addition to the 38 industrial sites, an elaborate service center to house a clinic, banking institution, restaurant and additional facilities to provide services apropos to the industrial community. Detroit water and sewer, heavy duty paved concrete roads, Consumer's gas and Detroit Edison power will be provided.

Bowman added that reasonable restrictions will be enforced to maintain a park-like atmosphere and to guarantee lasting values to all participating industrial firms.

Ideally situated adjacent to the I-96 — I-275 Interchange Freeway System, the Farmington Freeway Industrial Park affords direct access to freeway paths leading to Metropolitan Airport, downtown Detroit, and the East-West I-696 John Lodge Expressway, Lansing and all out-state areas.

Bowman pointed out that while the ground breaking ceremonies mark the start of the Industrial Park's formal service center, a number of firms already have completed plans or are in the process of actual construction in the complex. Among them are Diamond Automation — 77,000 square feet; Futurmill, Inc. — 50,000 square feet; Moore Industries — 20,000 square feet; Automatic Valve — 10,000

Wood Creek Farms Village

ANNE M. PHILLIPS
M.A. 6-6335

The Junior Wood Creekers will have a Halloween party on the 31st. It will be in the big front yard of the Troup on Westmont Court with a spook house and a big bonfire. Hot dogs will be available. Four prizes will be given, one each for the prettiest costume, the most original, the spookiest and the funniest. This party will start at 5 p.m. and be over by 6:30 so the young people can still go Trick and Treating.

Elizabeth Ann Dunham was born at Ford Hospital Friday, October 14. It may be that Nancy and the baby will be home by the time you read this for they are both doing very well indeed.

THE ENGAGEMENT of Dan Inman to Dee Zilka has been announced by Dee's parents. Dan and Dee have known each other for several years as they went to high school together. No date has been set for the wedding as Dan is in service.

Paul flew out to Las Vegas this past weekend and Dan joined him there. They especially enjoyed watching the golf tournament together.

Marian Zahniser is our district manager for the Torch Drive. Probably you will have been called on by one of her workers by the time you read this, I shall report the result to you.

The Zahnsiers vacationed in August by driving out to Colorado via the Bad Lands, the Black Hills and Mt. Rushmore to a dude ranch. Barbie, of course, loved the riding and the beautiful country. They reached home the week before school started.

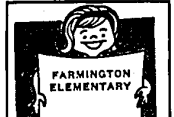

CLARENCEVILLE SCHOOLS MENU

Monday, Oct. 31
Coney Island Hot Dog

LADIES STEP FORWARD

"FEMINITE"

New Coiffure Line From Paris

ACCESSORIES

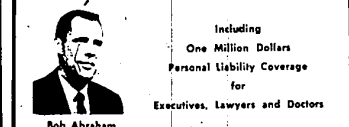

Color is the common denominator in the fashion, quick-changing accessory market this season. Clear bright shades are as important as neutrals. The rebound from "Kooky," off-beat apparel fashion to a more elegant, feminine look has created the need for more diversity in accessories — both color and style-wise.

Each hair style in the "Feminite" line creates a halo for the face, frames the ears, and gives the hair a look of richness and fullness. Adding to the beauty of the designs is the invisible support of a PERMANENT WAVE and the flattery of HAIRCOLORING in autumn tones of gold and brown.

"Michigan's Most Exciting Gift Shop"

ARE YOU A CURIOUS CAT?

Do you know any curious cats? Want to fix 'em good? What could be more of a surprise... a tease...downright TORTURE...than to give that special curious cat a gift sealed-in-TIN! Think of the frantic shaking, the futile guessing, the sleepless nights (passing the agony by giving your SEAL-IN-TIN gift several days in advance). It's the only peek-proof gift you can give.

AREN'T you devilish?
