

# CUTTING OF \$140,000,000 IS UP TO HIM

W. Averell Harriman, just twenty-one years old, has set the speculators of Wall street guessing as to how he will cast his deciding vote in the cutting up and distribution of the juiciest melon that Wall street has heard of in years. The Union Pacific railroad, which was the pet road of E. H. Harriman, the boy's father, has accumulated the tremendous surplus of \$59,000,000. To this has been added the \$81,000,000 which came into the coffers of the railroad with the sale, by court orders, of the Southern Pacific railroad. Now, young Harriman, Yale 1912, holds the deciding vote in the distribution of this vast sum of money.

## RATTLERS ARE LOVING PETS

So Says "Lonesome Jack" Allman, Who Has Caught 18,000 in California.

Los Angeles.—Ever since Lonesome Jack Allman was seven years old he has been "rattler" round snakes. He has captured his 18,000th snake. "The rattlesnake is the most intelligent of all reptiles and the most affectionate," Jack declared. "After they have been tamed they are the most desirable of snake pets. They can be made to come to you just like a pet dog or cat." Jack and his brother, Sherkey, made a journey through the mountains the past week in quest of snakes and brought back several large rattlers.

"I found out that rattlers were thicker in the mountains this summer than they have been for years," he said. "The season seems to have been just right to bring them out. A forest ranger told me that he had killed more this summer than in the last five years put together."

"I have been bitten by rattlers seven times in my life, but always had perfect recovery of poison with me and no permanent harm. I promptly apply the antidote before the knife and apply the antidote before the poison has had time to get into my system."

When Jack returned with the rattlers he entertained his friends with an exhibition of snake dentistry, in which he extracted the fangs from several rattlers.

"I haven't generally known that a rattlesnake has seven sets of fangs," Jack continues. "There is one pair of main fangs, one pair of reserve fangs and five pairs of fangs which float in the poison sac. If the main fangs are removed and one of the other pairs left in the mouth they will very shortly grow into position to be used. When I am traveling in the mountains and see a snake track in the dust I can examine it and tell what kind of a snake made it, which way it was traveling and about how long it has been since it passed by. I have a call that will attract rattlesnakes to me if they are near. I discovered the sound accidentally and keep it a secret."

### Protests but Pays

Griggs—I am surprised that you put up with your wife's extravagance.

Griggs—I don't. I merely put up for it.—Boston Evening Transcript.

### The Reason.

"Pop, why do decent society candidates have to ride the goat?"

"That's the way they have to butt in."

Branchial troubles weaken the system. Pneumonia sometimes follows. Dean's Men's Throat Lozenges prevent trouble.

After a man has loafed around awhile waiting for his ship to come in he is willing to compromise on a schooner.

In a year Turkey produces approximately 100,000 bales of wool of 280 pounds each.

## TORTURING TWINGES

Much so-called rheumatism is caused by weakened kidneys. When the kidneys fail to clear the blood of uric acid the acid forms and crystals like bits of broken glass in the muscles, joints and on the nerve endings. Torturing twinges dart through the affected part whenever it is moved. By curing the kidneys, Doan's Kidney Pills have cured thousands of rheumatic cases, lambo, sciatica, gravel, neuralgia and urinary disorders.

### AN UNUSUAL CASE

Charles Easton, of Walnut St., Waltham, Mass., says: "I have suffered from rheumatism and kidney trouble for years. I was laid up for months and spent hundreds of dollars unsuccessfully. I tried every treatment. After I had had Doan's Kidney Pills sent to my wife, they cured the worst I had. I feel like a new man and I have suffered since."
