# MEXICAN DICTATOR MUST RESIGN

HUERTA ORDERED TO RETIRE WITHOUT LOSS OF TIME! CANNOT LEAVE ADHERENT AS SUCCESSOR.

AMERICAN ULTIMATUM EAGERLY AWAITED BY OFFICIAL.

Only Two Answers Are Believed Open to Huerta—First, Refusal to Comply With the Demand; Second, His Retirement As Demanded.

Mexico City—President Huerta has been told that he must resign the presidency of Mexico without loss of time and that he must not leave as his successor General Aureliano Blumstein, his minister of war, or any other member of his official family, or of the unofficial coterie whom he might be expected to control.

This ultimatum from Washington was conveyed to President Huerta through his private secretary, Senator Rabago, by Nelson O'Shaughnessy, the American chargé d'affaires, acting under instructions from the state department.

Senator Rabago presented the memorandum to his chief but up to Monday evening President Huerta had returned no answer and, as far as could be learned, had guarded its contents from almost all of his official and intimate counselors.

Those who learned of the Washington note regard General Huerta's position as one in which he will be forced to give one of two answers: refusal point blank to comply with the demand, possibly going so far as to hand the diplomatic representative his passports, or the elimination of himself officially.

Federation to Open Stores. Calumet, Mich.—Officials of the Federation of Miners are making efforts to keep their men in line and checkmating, as far as possible, efforts of the Commercial club to induce the men to return to work.

The electrically driven collier Jupiter has made a successful 48-hour trial run of Santa Barbara, Cal. Capt. F. M. Bennett, commanding the Marechal, reported that the ship averaged 14.78 knots an hour for 48 hours, or more than three-quarters of a knot above her designed speed.

Fire destroyed all the farm buildings on the property of Henry M. Tilford, Standard Oil director, near Monroe, N. Y. The loss amounts to more than \$100,000.

## Mexican Revolt

A special telegram from Washington to the New York World says: "That President Wilson will demand the elimination of Huerta and his followers under penalty of intervention by the United States in Mexico is reported. Activities in army and navy circles are said to indicate the truth of this report."

A thorough search is being made by the police of Mexico City for evidence of an alleged plot against the life of Provisional President Huerta, disclosed to the authorities by two women.

Perpetual Motion. One may well be sure that there is no "perpetual motion machine." For this purpose machine has been contrived from time immemorial, but nothing has ever come of it. Men have gone mad on the subject, but without any practical results. It was demonstrated long ago by Sir Isaac Newton and De la Hire that perpetual motion is impossible of attainment. Even the solar system, the most wonderful machine of which we have any knowledge, will run down in the course of time, some say in about 11,000,000 of years from now.

What He Noticed. The extract to which the modern child is educated in matters of hygiene appears from a recent episode in a Boston school:

The class which visited the art museum and the teacher wished to learn what the children had observed and how they were impressed. The subject at the moment was the exquisite head of Aphrodite, one of the chief treasures of the museum. A little boy who frantically waved his hand was called upon. He announced triumphantly:

"I noticed she had adenoids!"

"Way, Peter," exclaimed the shocked teacher, "what do you mean?" "She keeps her mouth open all the time," was the reply.—Youth's Companion.

Only William. At a singing concert, Frankfort recently Kaiser Wilhelm, who attended, was served by several high school boys as pages. According to Jugend, he was attracted by the bright face of one of them and asked his name.

"Korner, your majesty," said the boy.
