On The **HOUSE**

by Weldon Clark

There are few things certain in this world, and one of them is that no woman is wearing shoes too large for her.

Drive-in banking was invented so cars could go in and see their real owners . . . "My advice, sir," said the mechanic to the car owner, "is that you keep the oil and change the car." He didn't want to marry her for her money, but he didn't know any other way to get it.

Anybody who says invention of the wheel was a boon to mankind has never played roulette!

Don't play games with anything as important as selling your home.
