Eyes Control Machines

A revolutionary electronic age device may someday enable paralyzed persons to propel, Jeffir wheelchafrs with the simple movement of their eyes. Richard L. Leaber, assistant administrator of the National Accountation and Space Administration, described the highly specialized device to a House Small Business subcommittee. He explained ANAS commissioned research on a switchoperated by by environments because it felt artificial gravity produced by the take off, and re-entry of space ships might produced by the take off, and relays, and turn by complete the produced by the take off, and relays to the produced by the take off, and relation to the produced by the take off, and relation to the produced by the take off, and relation to the produced by the take off and relation to the produced by the take off and relation to the produced by the take off and relation to the produced by the take off and relation to the produced by the take off and relation, the produced by the take off and relation to the produced by the take off and relation to the produced by the take off and relation, the produced by the take off and relation to the produced by the take off and relation to the produced by the take off and relation to the produced by the take off and relation to the produced by the take off and relation to the produced by the take off and relation to the produced by the take off and relation to the produced by the take off and relation to the produced by the produced by
