Just "Can't Get Over" Easy's Fence

Few years ago, Easy Roberts took a lot of kidding when he planted that hedge of Multiflora roses — along his property line. Folks said he was getting pretty high-falutin'.

But today plenty of people who laughed at the idea slow down when they drive by Easy's place — just to look at those roses. Most beautiful sight you ever saw.

Practical, too! The hedge is a good four foot high now, and at least five foot thick — even a shant could get through that prickly mass of shrubbery. Best of all, it cost less than ordinary fencing. (Might be well worth your while looking into.)

From where I sit, there's no sense in looking down on something just because it's different from what we like. For instance, some people think ice-cold lemonade's the best "cooler-offer" on a hot day. Some of us would rather have a glass of beer. The important thing is not to "hedge ourselves in" against other people's ideas and preferences.
