Fruit And Garden Notes

Most of the fruit growers th Most of the fruit growers that receive Karl Balley's fruit letters
already have this information concerning peach canker. Because of
last winter's serere cold, much
peach canker is now showing up
and now is the time to get rid of
it for effective control.

The canker will show up, in the
crotches of the tree and oftentifles
on the lower trunk. Some of it is

on the lower trunk. Some of it is rather hard to find but if not controlled, eventually will spread until the entire trunk is girdled. until the entire trunk is gridt. To clean out the canker, take knife and cut away all the brow wood and cut back to the whit wood. Scrape out all the gumm material. A good paint to use not not he wound is a wettable suffu paste. Next year, however, regula pruning compound abould be a plied to the wood.

Olly rags tossed into corners may ignite spontaneously — and often do, say Michigan State College farm safety specialists. Keep olly rags stored safely.
