The Lazy J Ranch's 1950 Ford F-2 Express with POWER PILOT was one of more than 5,000 Fords in the nationwide, 500,000-mile Ford Truck Economy Run.

George Stephens of the Lazy J Ranch says: "The low cost my Ford Truck showed in the Economy Run speaks for itself. I got regular service checkups from my Ford Dealer."

**"My ranch 'workhorse' runs for only 2 1/2¢ a mile!"**

Ranch owner George Stephens proved for himself, in the big Economy Run, just how little it costs to run his Ford Truck!

"The Lazy J's Ford Express did itself proud in the Ford Truck Economy Run," says Stephens. "Daily records kept during the entire six months show that our Ford Truck ran up a total of 5,109 miles. My out-of-pocket expense for gas, oil, maintenance and repairs was exactly \$123.51 ... about a \$20 bill each month ... only 2 1/2 cents a mile!"

The Ford Truck POWER PILOT carburetion-ignition system is one reason why Ford Trucks cost so little to run, in ranch work or any work. The POWER PILOT gives you the most power from the least gas. In the low-price field, only Ford has it!

## Unwritten Laws of the Road

Sponsored by the Farmington Kiwanis Club in cooperation with the Farmington Enterprise

## No. 1: Three Classes Of Drivers.

This is the first of a series of 26 lessons on safe driving. Each one covers a specific practical driving situation.

The real "know-how" of accident-free driving is contained in what might be called the unwritten laws of the road. These are known to professional bus and truck drivers as "tricks-of-the-trade".

Which of the following three classifications are you in?

Amateur Drivers who are clumsy that they actually cause accidents by the way they drive.

Semi-Pro Drivers who drive well enough not to cause accidents by the way they drive but not well enough to avoid being hit by amateur drivers.

Professional Drivers who are so good that they not only do not cause accidents by their method of driving but who, in addition, are sharp enough to outguess the amateur driver and not hit by him.

Any driver learning to handle the 24 specific situations described in the rest of this series will make a good beginning on becoming a "professional driver".

equipment, such as X-ray. By the time fluorine was actually being added to the water, no change was noticed.

The size of the community has shown little bearing on the decision to take the decay-saving step. The largest city to adopt fluorination last year was Saginaw. Now they have Three Oaks, population 1867, is actively considering fluorination. At Three Oaks, the step is being promoted by civic groups; the water system is privately owned.

Although experiments on the effects of fluorine additions to drinking water are continuing, enough experiments have been completed to make the American Dental Association, the American Waterworks Association, and the Michigan State Board of Health strong supporters of the idea. All three are strongly recommending and encouraging fluorination.
