ROLLING DOWN THE RIVER

By Bob Kettler

Some sage was telling us the other day that while getting an education wasn't too difficult these days, it seemed to take some folk an awfully long time to get around to using it.

But then, that has never been the trouble here at this modern Studebaker motor mart. Once we've had the opportunity of educating you good folk in the advantages of this wonderful '51 V-8 Studebaker Commander of ours, we've found you'll use that education almost immediately. The amazing power and quick acceleration of the compact V-8 engine, the ease of handling on all sorts of roads, the perfect visibility and comfort of the car combine to give you the thrill of new discovery. Why not let Studebaker educate you as to why it's the driving sensation of the '51 season by arranging for a free demonstration today?

"Cigarette advertisements to the contrary," the fellow in our parts department states, "if you don't think that smoking makes a woman's voice harsh, try dropping some cigarette ashes on her newly vacuumed rug."

Not too long ago we were talking about the 42c dollar and here the government has come out and printed some. Anyway they sent a flock of legal tender to a bank in Kansas with \$10 printed on one side and 35 on the other. They should have completed the job though, by stamping "for government use" on the ten back side and "for public use" on the five dollar marker.

Now everyone cannot be a master motor mechanic, which is why part of this establishment is devoted to a department commonly known as "the shop." The reason we maintain this gadget is to insure you of a perfectly running car at all times, and we hope that you make proper use of it. Nothing is so frustrating to the boys in the shop as to hear you driving down the street with a couple of pipes in that pipe organ missing. Bring it in and let them give it a tune-up for better driving this summer. Incidentally a bit of lubrication and an oil change won't hurt the car either.

A lady, who loves her '51 Studebaker, was telling us the other day that the best way to determine the depth of the mud under a hard rain was to measure it on a four year old boy.

Yours,
BOB KETTLER
