

Remember that odor is the best guide in buying melons. Color, plumpness and freedom from blemishes also should be considered in buying all fruit. Size may affect the price of fruit but does not affect its eating quality.

Give Easy Rules To Make Accidents Happen

Are you a farm accident just waiting for a place to happen? You are if—
You try to fix machinery while it is running.

Use kerosene to start fires—or pour it in a closed shed.
Handle your tractor like Barney Oldfield.

Neglect repairs around the barn and house such as weak steps, weak ladders and weak floors.

If you check up on your farm safety practices during National Farm Safety Week and then observe them 51 more weeks out of the year, you are a safe farmer and a smart farmer. Michigan State College rural safety specialists contend.

FARM NEWS

Storing Wheat May Save Money

Wheat growers may save themselves 10 cents or more a bushel by learning about the storage and government programs which help eliminate the necessity for selling their wheat during the harvest season rush.

The usual seasonal decline in prices coupled with the Korean peace talks have been reasons for lower grain prices in recent weeks, reports Clarence Prentice, extension marketing specialist at Michigan State College.

He says that heavy marketings during the rush of harvest are likely to further depress the market. The advantage then becomes greater in favor of storage and the government program to farmers who want to protect themselves against losses.

Here's the way Prentice says the programs stack up this year. Farmers will stand all storage costs as the allowance for storage has been discontinued. Farmers have until January 31, 1952, to apply for a purchase agreement or loan, either of which will guarantee the support price.

Cost of the purchase agreement is a half cent a bushel. Cost of the loan is one cent per bushel.

If a farmer needs the cash, it is logical to request the loan from County PMA authorities as early as possible following harvest. However, under a purchase agreement, there is no advantage in applying before the last of January. Under either plan the wheat may be sold at a higher price if the cash price should go above the guaranteed government figure. In case of a loan, the loan-plus interest must be paid first of course.

Support guarantees were announced early last fall on wheat. The exact loan rate just released for wheat is \$2.25 a bushel, based upon 90 per cent of wheat parity price as of July 1.

1/2 Million 4-H'ers Helping Reduce Farm Accidents

A recent survey of 2,000 farm accidents shows that 248 involve machinery. In other types, more farm people are injured by falls—476—than in any other kind of accident.

FALLING POLKS, as a general rule, farms must be guarded against accidents. An average of 47 farm people are accidentally killed every day.

Helping to reduce rural casualties are a half million boys and girls taking part in the National 4-H Farm and Home Safety Program. More than \$10,000 in awards for the best records of accident prevention and education are being provided by Government for the seventh consecutive year.

The program is directed by the Cooperative Extension Service.

SWEET CORN EARMORM

Dr. Ray Jones, Extension Specialist, says that sweet corn earmorm can be controlled with DDT. He suggests using three pounds of 50% wettable DDT, plus 1/2 pound wetting agent per 100 gallons of water per acre. Apply to the silks when the silks are 2, 4, and 5 days old. There three applications will insure coverage at least once to most of the ears of corn.

CLEAN GRAIN BINS

Each year many folks have to go through the disheartening process of shoveling over grain and fumigating to get rid of insects. One of the best things that can be done to prevent this is to clean the bins thoroughly and now, before harvest is too far under way, is the time to get the job done.

Here is a suggested routine for the job: Sweep floors, sidewalks and dividers thoroughly with a broom. Vacuum the bins if possible. Spray with a solution of DDT, three tablespoons per gallon of water and give at least 24 hours of drying before putting new grain in after spraying.

APPETITES BREAK PAR AT THE HARBERTS'

Their Range? ELECTRIC, of Course

Chick Harbert, no-right miller, "Harbert's Electric Range," and Professional Electrician, Canton, Mich., Detroit.

"Hot weather makes you appreciate your electric range more than ever," says vivacious Mrs. Chick Harbert. "The kitchen stays so cool and comfortable when the oven is in use."

"And there's a lot of baking done at our house, even in the summer," adds Chick. "Deirdre and Kathleen are chocolate-cake fans."

"Chick and I go for broiled foods... steaks and chops take on a wonderful electric-broiled flavor," continues Mrs. Harbert. "We have other favorites, too... deep-well cooker dishes."

This attractive modern family approves wholeheartedly of their electric range. Why don't you enjoy all the advantages of electric cooking? Your dealer will be glad to tell you the whole story.

Chocolate Cake
Deirdre and Kathy's Favorite

1/2 cup butter
1/2 cup sugar
2 eggs
1 cup milk
2 cups cake flour

1/2 teaspoon salt
2 teaspoons baking powder or 1 teaspoon soda
3 squares chocolate, melted, or 1/2 cup cocoa (dry)
1 teaspoon vanilla
Add egg yolks, mix and add dry ingredients, mix until stiff. Bake in shallow pan at 350° for 30 minutes. Top with cream-milk frosting.
