Defense is your job, too!

Swabbing down their cruiser's forecastle deck or passing ammunition to her eight-inch guns, it's all in the day's duty for these young American seamen. Day or night, fair weather or foul, they're on the job, keeping the United States Navy our First Line of Defense—for America and for you.

But in these critical times, defense is your job, too. And one of the most important parts of that job is maintaining the economic strength of America, as the sailors are working to maintain her naval strength. How can you do that? By buying U. S. Defense Bonds—buying them now and buying them regularly. So go to your pay office and join the Payroll Savings Plan or sign up at your bank for the Bond-A-Month Plan. But do it today!

The U. S. Defense Bonds you buy give you personal financial independence

Remember that when you're buying Defense Bonds you're building a personal reserve of cash savings. Money that will some day buy you a house or educate your children, or support you when you retire. Remember, too, that if you don't save regularly, you generally don't save at all. So go to your company's pay office—now—and sign up to buy Defense Bonds through the Payroll Savings Plan.

Don't forget that bonds are now a better buy than ever. Because now every Series E Bond you own automatically goes on earning interest every year for 20 years from date of purchase instead of 10 as before! This means that the bond you bought for \$18.75 can return you not just \$25—but as much as \$32.31! A \$37.50 bond pays \$68.66. And so on. For your security, and your country's, too, buy U. S. Defense Bonds now!

Buy them regularly!
