Warns Against TV Dangers in Home

Cooperating with all families in their efforts for safety and fire prevention, Mrs. Josephine Lawyer, Home Demonstration Agent, cautions against the dangers of television sets in the home.

If the aerial is attached to the chimney, the constant vibration of the aerial in the wind may weaken the mortar at the base of the chimney. Then two things may happen. Sparks may fall onto the roof or hot gases may accumulate in the walls or attic of the house.

Homeowners of the county are checking the location of their television sets to make certain there is ample ventilation. If the set is placed in a tight corner or flat against a wall the generated heat could damage the set.

Full feeding grain is the quickest way to get a steer to market. It isn't necessarily the cheapest, but it is the most profitable.

Plain cattle, for instance, should be fed longer and more cheaply than western breeders, good type, according to C. A. Brannaman, Michigan State College animal husbandry authority.

Under present cattle and feed prices it is possible to pasture cattle for two summers, feeding rough on the islands only two and three years ago, says G. A. Ammann, conservation department, game specialists.

Two Year Old Takes Overdose of Aspirins

Sharon Akers, two year old daughter of Mr. and Mrs. Akers of 33776 Rhoadwood, gave her parents a bottle of aspirin and took quite a few. Her parents weren't sure how many she had taken and called Farmington City Police.

Sharon was rushed to Redford Receiving Hospital for emergency treatment Wednesday when she was struck by a car near Redford in Detroit.

According to Col. Smith, her husband, Mrs. Smith had just gotten out of the car when she noticed a car approaching. She succeeded in backing away from the car but the wheel ran over her left foot. She

Expect Herring Run To Start in Lake Huron

The dollar may not buy much these days, but it will buy several fish for the Michigan State Police.

Lake Huron commercial fishermen advise the conservation department the big fall herring run is expected to start in early November.

During heavy fall runs the price is only a fraction of the cost of hamburger, sixty to eighty per cent lower than lake trout and yellow perch.

To encourage the use of this underrated but nutritious fish food, the department offers tested recipe books to housewives and fishermen who want to know different and tasty ways of serving.

Herring is the largest fish crop of Michigan's Great Lakes waters. Last year, 2,600,000 pounds were harvested last year.

As in past years the Michigan State Police and the State Department of Conservation will be active during the 1951 deer hunting season in making a free registration service available to hunters who desire to be reached in camp if an emergency should arise.

Under the plan, a hunter registers at the State Police post or Conservation headquarters nearest his camp. Before leaving home he should register at the office of the station at which he is registering.

In the event of an emergency, those at home need only notify their nearest State Police post or Conservation headquarters and the message will be radioed to the specified registration station.

Either a State Police officer or a Conservation officer will deliver the message to the hunter.
