FOCUS:

Suburbia

IS having it delivered to your doorstep each weekend . . . and reading about things that are important to suburbanites. Things like what's new on the recreational vehicle scene -- look for that one next weekend.

Do you think picnics are beautiful? Lots of people do and we'll FOCUS on them this month when we find out what they were like in the good old days and what they can be like in the NOW years.

June is shaping up as a beautiful FOCUS month, too, with a planned look at Outdoor fashions, gardening, home accessories and summertime sports and fun things with which to fill your leisure hours.

It's true! When you focus on suburban life a great big portion of it is truly beautiful.
