New Deck Adds Zing To Patio

Letting the imagination roam when planning a new deck lends individuality and zing to an outdoor living area, lifting it out of the utilitarian

class. Size of the deck planks used can make guite a difference in

Size of the deck planks used can make guide a difference in appearance. Broad 2x4inch Douglas fir will produce an entirely dif-rement effect than commmoally used fir 2x4s. Placing 2x4s flat will look different from a deck built of 2x4s on edge. Visual effects can be created by placement of the decking in one direction or the other. Laid parallel to house walls, the deck will seem longer. When boards are set at right angles to the house, the deck appears wider. For an eight-page colorfully illustrated booklet of deck ideas and a folder of plan details for three decks, send 25 cents in coin to Vestern Wood Products Assn., Dept. 520-13 P., Yeon Bidg., Portland, Cr.
