Fisher CONSONT COMPONENT STEREO SYSTEM

THE FISHER 201

The Fisher 201 has to be one of the most outstanding values among AM/FM stereo receivers. Although reasonable in price, it delivers the quality, performance, and features you expect from Fisher. The Fisher 101 speaker system is composed of an 8" woofer and 3" tweeter with a frequency response of 37-20,000 Hz. They deliver the big sound.

THE FISHER 310X

COMPLETE SYSTEM INCLUDES:

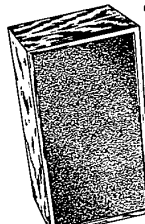

- FISHER 201 -- 80 Watt -- AM/FM Stereo Receiver with effortless flywheel tuning
- 2 Fisher 101 2-way Speaker systems
- The FISHER 310X automatic turntable including SHURE magnetic cartridge, base and dust cover.

Total sound is the full impact... distortion-free sound. You can play this Speaker System at full volume and you will consistently enjoy the pleasure of complete musical definition of instruments, natural presence and perfect musical balance. Begin with the strength and fidelity of the bass notes... they're reproduced by the powerful woofer incorporating a rolled free-edge cone. Here is the efficient long cone excursion necessary for faithful reproduction of the low frequencies. Brilliance and purity of sound are the hallmark of this system's powerful high frequency driver and wide dispersion reproducer. A completely airtight enclosure provides an "air cushion" which damps out the

speaker's natural tendency to coil, rine, vibrating once it is set in motion. Compliance of the air permits the speaker cone to move forward and backward, but returns the cone to its natural position once the cycle is completed. Since the air has little mass, it has no audible effect on the sound, its purpose is to eliminate inertial vibration, harmonics and distortion which otherwise would alter the sound from the original. This system offers theoretically perfect acoustic dimensioning and a completely airtight seal. Front and back baffles are permanently sealed with a special epoxy and the speakers are gasketed to insure an efficient and airtight acoustic suspension.
