

Fish, Astrology Are OU Topics

ROCHESTER
The ecological realm of fish, the dangers of eating, and a personal approach to astrology are but three of the interesting topics covered by the winter term of Oakland University's division of continuing education.

The winter term begins January 22 and persons may register by phone.

Ronald J. Spiller, district fisheries biologist for the Michigan Department of Natural Resources, will lead class discussions on Wednesdays on lake and stream succession, relation of kinds of aquatic life, fisheries, management, culture, environmental problems and fishing.

HANS JAEGER of the Michigan Metaphysical Society will present a highly personal approach to astrology on Tuesdays.

A pattern of astrological principles will be developed for students to use as a tool for self-development, and as a starting point for chart delineation.

On Tuesdays, Janet Odell, a food writer, will present the

JAMES H. JONES of Farmington named project manager by Ellis-Nagyert Associates, Inc. of Detroit. Jones, a senior industrial engineer, is a graduate of Ohio University with a bachelor of civil engineering and is studying for his master's at the University of Michigan. He and wife Susan have three children.

Real Estate Courses Told

ROCHESTER
A large selection of credit-free real estate courses are being offered in the winter term, beginning Jan. 22, by the division of continuing education of Oakland University in Rochester.

Persons planning to take the state salesmen and brokers licensing examinations may enroll in the Michigan Real Estate Assn. approved Graduate Realty Institute courses.

These are offered evenings and monthly in an accelerated four-day format. A one-day real estate math refresher, offered monthly, helps salesmen promote taxes and insurance, figure mortgage discounts and closing costs, and review basic math.

Additional courses include introduction to real estate, brokerage analysis, Law I and II, finance, Appraisal I and II, investment and strategy, property management, and residential construction.

Top Rusher

Michigan State's leading football ground gainer in 1972 was sophomore halfback David E. Brown of Bloomington, Ind., who ran for 575 yards on 123 rushing attempts.

basic facts of good nutrition and food budgets. The attempt will be a happy medium between claims of fanatic health food proponents and merchandisers of many questionable nutritious processed foods.

Bengt L. Swenson will offer a design in interiors course on Tuesdays and an advanced course on Wednesdays.

RESEARCH on behavioral differences between the sexes will be presented on Tuesdays by Joseph Lughermo, manager of development and training for Michigan Blue Shield.

The course will seek new understandings of the development of sex roles.

effect of sex roles on personality, and relationship of these roles to problems in communication between sexes.

A Wednesday course by Phyllis M. Herrin will explore the roles of women in contemporary American society, such as the woman's image in media and women's liberation and its influence on American life.

HOW TO COPE with change to convert it from a disorientating, undermining experience to an inspiring, enriching one is the subject to be handled on Mondays by James F. Kunes, educational consultant for Bergamo Center.

Donald E. Morse will explore the world of folk music through recordings and live performances on Wednesdays. Professor Morse, Oakland University professor of English, is host of "Folk Show" on WQRS-FM.

Judith A. Lewis's Thursday course offers specific advice in planning, preparing, and getting your money's worth from a successful trip abroad.

David Green will conduct on Thursdays a creative writing course. Courses for beginning and advanced photographers will be offered on Thursdays and Tuesdays respectively. On Wednesdays, a workshop in basic developing and printing of black-and-white film will be offered.

STEPHEN W. BARANYK has joined Babcock & Wilcox Co. as vice president of the Automated Machine division. This includes Century-Detroit, a builder of hydrostatic grinding machines, and B&W Automation, designers of parts handling and automated assembly systems. Both plants are in Southfield. Previously, Baranyk was president of Van Norman Machine Co. and vice president of Precision Engineering for Gulf & Western Industries, Inc., of Southfield.

2 Residents Teach Life Concerns

ROCHESTER
Southfield residents are helping adult students to become more competent in relation to adults' dominant concerns which differ at various stages of the life cycle.

Educational authority Robert J. Havinghurst has found the dominant concern for those 20-30 years old is focusing on the life ahead.

Persons 30-40 are concerned with one's energies, and those between 40-50 with exerting and asserting oneself. During the fifties, the concern is maintaining position and changing roles.

By age 60, the focus is on deciding to disengage and how. After age 70, the emphasis is on making the most of the disengagement.

Southfield residents instructing pertinent credit-free evening courses offered by Oakland University's division of continuing education, beginning the week of Jan. 22 in Rochester, are: Hanica C. Ullman, continuing education faculty, medical terminology; and, Dr. Alexander S. Ullman, director of labs, Crittenton Hospital, human physiology in health and disease.

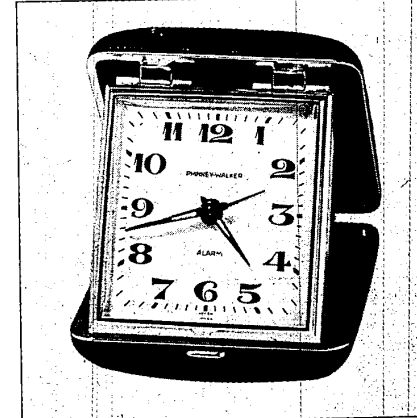

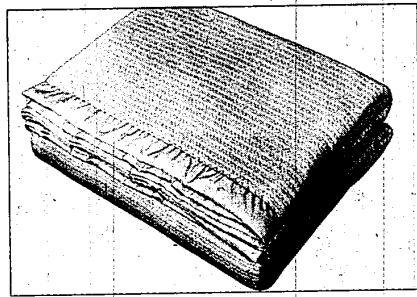

Also: A.W. Gault, general staff supervisor for Michigan Bell, group dynamics—the process of interpersonal relationships; David A. Hauge, programmer analyst for the University's computer center; and, Robert M. Boltwood, communication coordinator for Chevrolet, effective business writing.

Harold Bremer

ANNOUNCING QUAKERTOWN'S first FIRST.

Grand Opening January 12-26 . . .
help us celebrate with a free gift.

First Federal Savings of Detroit's brand-new home in Quakertown, Farmington Road at 12 Mile, has just been completed and we're all moved in. So we're having a Grand Opening celebration starting Friday, January 12.

Celebrate with us by adding \$50 or more to an existing account or by opening a new savings account with a deposit of \$50 or more, and you'll get a free gift: your choice of a travel alarm clock, a thermal blanket, or a transistor radio. For yourself or for someone you like.

Celebrate a little more modestly and we'll provide you with a sturdy, useful First Federal key chain. In fact, every depositor who visits our Grand Opening gets one of our key chains free. Last, but not least, you'll get the kind of year-round service that made us First.

That happy face you see above is Harold Bremer, the manager at the new Quakertown office. He's happy because you'll be happy when you watch your savings grow with the help of First Federal's 5% per year daily interest. That's 5% daily interest, that earns from date of deposit to the date of withdrawal on all regular passbook savings accounts, paid and compounded quarterly. No minimum deposits; no withdrawal restrictions.

All First Federal Savings of Detroit offices pay 5% on regular passbook savings accounts. But only the Quakertown office is giving things away. Federal regulations permit only one gift per account, and the offer is good only while the supply lasts. So come on in, soon.

Office Hours: 9:30 to 4:00 Monday thru Thursday, 9:30 to 6:00 Friday. Telephone: 477-8500

We can do more for you if you'll think First.
