

ONE TIME COPPER KING IS VERY ILL

F. Augustus Heinze, who made millions in Montana copper mines and lost them in New York bank and stock deals, is dangerously ill in New York. Abdominal hemorrhages and liver troubles are believed to be responsible for his condition.

FRISCO BANKER TO BE RUSSIAN ENVOY

George I. Marjoe, wealthy banker and lawyer of San Francisco, has been selected by President Wilson as ambassador to Russia and his name has already been submitted to the Russian government for its approval. Mr. Marjoe was mentioned for ambassador to France with William G. Sharp before it was settled that Mr. Sharp would get the place. He was born in Baltimore in 1856 and was educated in England, Germany and Italy. While his business interests are mostly in the west, Mr. Marjoe has for several seasons maintained a home in Washington.

TO STRENGTHEN HAWAII

As soon as the troops can be transferred the United States forces in Hawaii will be increased from 8,000 to 15,000 men. General William H. Carter is in command of the division.

Ohio Woman Campaigner Denies that Suffrage Workers Arent Home Makers

Mrs. Dora C. Horine and her grandchild, Robert Meade, Jr. Mrs. Dora C. Horine, of Cleveland, likes to refute the argument that suffragists are not home makers. Mrs. Horine is field organizer for the Ohio Woman Suffrage Association and has perfected organizations in a number of counties during the present campaign in the Buckeye State. One of her principal arguments on the domesticity question is her first grandchild, Robert Meade, Jr.

A PROFITABLE VOLCANO.

The republic of San Salvador is the only government on earth that collects lighthouse fees on account of a volcano that it owns—and without the slightest cost of upkeep.

THIEVES 'FISH' GET \$2,500 LOOT.

Cleveland—Thieves recently cut a circular hole in the window of Aaron Bergman's jewelry store, just across from the city hall, and, using a pole, line and hook, fished out \$2,500 worth of jewelry. The vicinity was brilliantly lighted and the robbery was a bold one.

"What's the Constitution?"

"No court shall assume or exercise the power of declaring this act unconstitutional." These words, in an amendment submitted by Congressman Noland, moved the House of Representatives to laughter. If it would only work, such a clause in every bill would be an easy way to dispose of the constitution that has bothered a good many ambitious legislators.

ALASKA WOMEN DECIDE RESULTS.

According to cable advices the women who voted for the first time in Alaska decided the results in the recent elections. In Sitka, Alaska, the women stored voters to the polls and treated them to cigars and lunches. In Juneau the women helped defeat the people's party.

WANTS FIVE YEAR CENSUS.

A census of the population of the United States should be taken every five years instead of every ten years, declares S. N. D. North of New York, former director of the census. "To complete the service which the government of the United States owes to itself, to the people of the whole country, and to the health authorities of the state and municipalities, a quinquennial or five year census of population is necessary," he said. "In vital statistics," Mr. North said, "the United States stands at the foot of the nations of like rank in civilization."

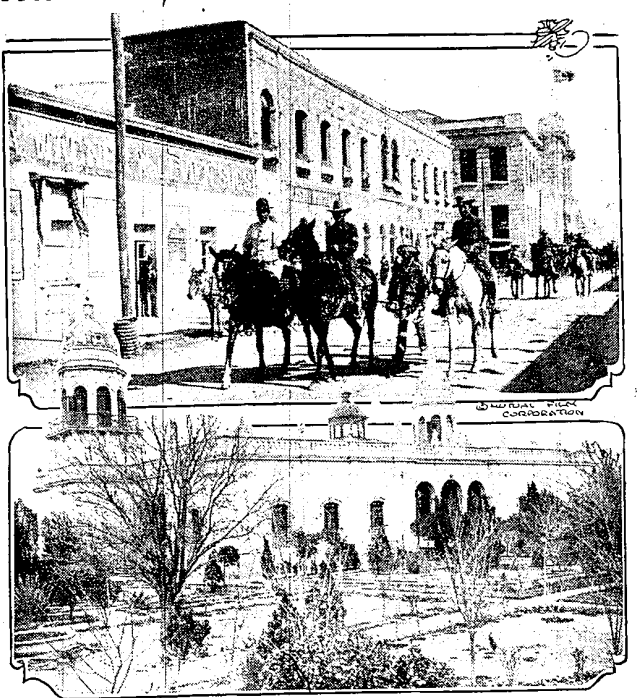

PLANS GREAT HARBOR.

Tilamook, forty miles west of Portland, Ore., is to be made a great harbor by the James J. Hill interests. Two large ships are being built to run between northern and southern ports on the Pacific coast.

TEN CENTS' WORTH OF FARM.

Breeders' Gazette: Land is cheap. For easy figuring let us say it is worth \$100 an acre. A square rod, which is worth only 21 and 10 cents, would be a little more than 27 square feet, or a little farm slightly more than 5 feet on a side. How often a boy will waste a dime and think nothing of it. For a dime he can buy land enough to hold a flower bed, four hills of clover or a peach tree. The boy who can save a dime can become rich. Make a dime look like a tiny farm. The boy who learns to save a dime and to know values will some day come into his own.

ORDER PREVAILS WHERE VILLA REIGNS; BRINGS GOOD GOVERNMENT, BUT HIS MONEY HAS DOUBTFULL VALUE

Scenes in Chihuahua, a rebel stronghold. Top, some of Villa's soldiers. Bottom, Quinto Carolina church.

Chihuahua, Mexico, June 25.—(Special)—Whatever may be said in criticism of General Villa, no one as yet has risen to deny that he has established order in the cities he has captured. As good a government, and perhaps even a better one, exists in Juarez, Chihuahua, Torreon and Monterrey today as existed before these towns fell into rebel hands. The lives and property of persons friendly to the Constitutional cause are quite safe in these cities, though it is doubtful if as much can be said of persons who are unfriendly to the rebel chief.

Probably one of the most discouraging things in connection with Constitutional government is the large amount of paper currency of uncertain value which is now in circulation. States Issue Money.

Under the seal of the Constitutional treasury notes have been issued by Sonora, Chihuahua, Coahuila, Durango and other states, but the uncertainty arises over the amount actually put in circulation under this authority. There is every reason to believe that several of the states have issued paper notes on their own account. Already some questions are raised about the currency of the state of Tamaulipas. While it is probable that if the Constitutionalists succeed the currency authorized by the Carranza government will be redeemed, there is apprehension lest much of the state currency be repudiated.

Nevertheless, at present the notes of the different states circulate outside of the state in which they are issued. General Villa has a mint at Chihuahua which is expected to coin silver dollars and half dollars. Over on the Pacific slope in the state of Sinaloa a composition silver dollar has been minted in the sand. In Coahuila some Constitutional patriot obtained the die for minting the Carranza dollar, and substituted for the inscription the phrase, "Muerto Huerta—death to Huerta." Some of these dollars were put out.

Printed in the United States. A leading cause of the uncertainty is the large amount of spurious currency which is known to have been put out. The recent issues of Constitutional money, so-called, have been noted by reputable firms in Washington, New York and San Francisco and cannot be counterfeited easily.

In the effort to revive trade and industry little encouragement can be had to foreign banks, because they cannot afford to sell goods and take their pay in currency which they are not sure will be redeemable. At the same time they are asked to take it. On the other hand, Mexican imports cannot afford to pay for foreign goods and sell them on the uncertain basis of Constitutional currency.

It seems odd that no effort has been made to answer such questions by actual test.

Child Marriages Upheld. In the district court of Denver, Colo., Judge H. P. Burke ruled that under the common law a marriage between a boy of 18 and a girl of 16 is binding. The case was that of Harvey M. Pugh against Martha Elizabeth Pugh for annulment of their marriage both being minors.

Wealth Exaggerated. Apparent there are not as many rich men in this country as was supposed. Or else the rich men are not so rich as they were believed to be. The amount of money realized from the income tax is reported as \$24,000,000 less than the treasury experts had estimated.

This indicates that the total income of all American men and women above \$4,000 a year is about three billion dollars. If that total income were divided among the people of the United States it would give each about eight cents a day.

LESSON OF GOOD ROADS. Harper's Weekly: "In Missouri two farmers living in separate counties but at an equal distance from the cotton market, learned by telephone that cotton had gone up in price a dollar a bale. One farmer lived on a very bad road, and he could haul one bale of cotton. The other farmer, living on an improved road, hauled four bales. The rise in price gained the first farmer \$1, and the second farmer \$4. A farmer in Sullivan county, Tennessee, a few miles from Bristol, had 100 bushels of potatoes which he intended to market during the winter."

TEACHERS TOO YOUNG. Moline Mail: School teachers of mature years, both men and women, make the best and most successful teachers because they know more of the world and human nature than a young person of 16, 18 or 20, who hasn't at that age begun to know even of himself. But predicts the valley farmer, until it is possible to make a living and support a family by teaching school, teaching will continue to be the pin-money side line it now is, especially in the country districts. Make school teaching worth while and good teachers will be plenty.

MILLIONAIRE IS DOG CATCHER. As a joke, citizens of New Trier township, a Chicago suburb, elected Sherman M. Booth millionaire society man and prominent progressive, poundkeeper. Mr. Booth says he will take the office and fill it efficiently, too.

A DETROIT OPTIMIST.

Judson Bradley, the Well Known Really Expert, Tells What He Believes the Best Investment. "I am sure you will agree with me," said Mr. Judson Bradley, who is conceded to be one of the foremost real estate experts in Detroit, in a recent interview, "that Detroit real estate at this time is one of the most attractive propositions in the United States for investors." Continuing, Mr. Bradley gave numerous reasons why he expressed this optimistic opinion. He said that actual statistics have proven Detroit really more active than in the majority of other cities. In Detroit there has been a radical change of recent years—more manufacturing establishments have started—more substantial buildings have been erected. On Grand Circus Park, for instance, at least half a dozen steel skyscrapers are now under way, and Detroit is predominantly the automobile manufacturing center of the United States, if not the world. In Detroit living expenses are comparing favorably with those of any other city—and there is a multitude of pleasures for the summer tourist unexcelled in the country. Taking every social, educational and commercial aspect into careful consideration, there is no reason to doubt the increase in Detroit's population to a mark a hundred thousand in excess of the present population in a very short period. As the city expands and grows there is added call for good property in the direct line of growth, and Mr. Bradley has placed on sale a few choice lots, some sixty in number, under the name of Cortland Heights. This property is particularly well located and selling at a price no greater than that asked for lots much farther from the center of the city. Cement walks, graded streets and quick service are afforded, and the investor who makes a fifty dollar deposit here is assured of a certain and a substantial increase on the money invested. Either for home purposes or for money making without risk it will be well to get in touch with Mr. Bradley, whose offices are located at 320 Ford Bldg., Detroit, Mich.

"GARDENS OF GOLD"

Would Seem Appropriate as the Title for This Proposition.

Out along the shores of beautiful Lake St. Clair, just an hour's interesting ride from the city of Detroit, is located that superb section known as Glenwood Gardens. Here nature reveals in revealing beautiful beauty, and the land is rich and fertile; fruit trees abound in generous numbers; and the glorious lake breezes are always in evidence.

This is a healthy spot—a spot that has attracted great attention, and the fact that choice, large gardens can be bought now at far less than they will command in a very short time, makes the offering one of interest both to the builder and investor alike. It is wonderful how very easy money can be made in these deals, for so few dollars need be paid down, and five dollars a month, and often before the payments are finished there is a sale at a profit of fifteen to thirty per cent. There is no risk in Detroit realty—it is making fortunes right along for those wise enough to get "in the game," and here the Glenwood Gardens offer not only the usual inducements—but each garden, with its fruit trees, its great wealth and accessibility, make it doubly worth while.

Full and interesting details of this proposition will be gladly sent to you on request by the Craig Exchange, 306 Hodges Bldg., Detroit, Mich., who are directing the property and sales.

It is Near at Hand to Many of Our Readers.

Don't neglect an aching back. Backache is often the kidney's cry for help.

Neglect hurrying to the kidney's aid. Means that urinary troubles may follow.

Or danger a fearful kidney trouble. (Here's convincing testimony.)

John Humes, retired railroad engineer, 554 Fourth St., Monroe, Mich., says: "Kidney trouble came on me gradually and I got pretty bad before I paid much attention to it. The kidney secretion was highly colored and too frequent in passing. I was obliged to get up several times at night. I suffered from severe backache and constant pains through my kidneys. When I laid over, I could hardly straighten up again. I was in bad shape and used different remedies, but nothing seemed to help me. Doan's Kidney Pills had been used in the family, so I decided to try them. They gave me great relief."

Try Doan's at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Humes had. Foster-McMillan Co., Props., Buffalo, N. Y. Adv.

CATS BREAK UP HOME.

In dismissing a charge of wife desertion against Daniel Lynch, Judge Uhlir of Chicago decided a man should not be expected to support a household of cats. Uhlir said he couldn't bathe because cats occupied the bathtub and that his wife spent \$8 a week in buying candies for cats and kittens.

THE DEAF CAN HEAR.

A telephone for the deaf is one of the novelties of science, lately invented by a German electrician.

It is really a combination of the telephone and microphone. The deaf person holds to his ear a small telephone receiver, and the person with whom he is conversing speaks into a small microphone. The sound is magnified.

This entire apparatus can be carried in a small hand bag, or in a muff, or in the pocket.

THE SPREAD OF PROHIBITION.

The Norwegian Parliament, following the example of Secretary Daniels of our Navy Department, has forbidden the use of intoxicating liquors by officers or men of Norway's army and navy.

COST OF PANAMA CANAL IN LIVES.

Since the beginning of work, in 1904, the Panama Canal has cost 1219 lives, through accidents.

WHICH WILL MEET SHAMROCK?

The honor of defending the American cup seems to lie between the Vanite and the Resolute. The other American yacht, Defiance, failed to make good at the trial races.

Ladies Hair Goods. Human hair switches; made from your own combings if desired. See our special switch bargain at up from The most complete line of Hair Goods in Detroit. Drop in when in the City or write for prices. EXPERT DOLL REPAIRING A SPECIALTY. NEW YORK DOLL HOSPITAL. 365 Michigan Ave. Detroit, Mich.
