Concrete Silos

They have been tried and found perfect and are beyond an experiment. The last season has seen many built in other places. There have been five built near Farmington, Oakland County, Mich. They proved to be a success. If you are in need of one it will pay you to inquire of J. W. Hatten, Farmington, Mich. He has built the above five and is prepared to build them the coming season. They are fourteen feet in diameter inside, with a five inch wall built any height you may wish. They are built for less money than the better class of stave silos and have the lasting qualities.

Card of Thanks.

I wish to thank the good people of Farmington for their generous appreciation of my services as shown in the annual church dinner given by the Ladies Aid society last week Thursday. I trust I shall ever merit the good will of all and the assistance of those not otherwise engaged in supporting the Master's work.

SPECIALISTS SUCCEED

Because They Enjoy Advantage

Over General Practitioner.

It is no discredit to the general medical practitioner that the specialist is winning greater and greater success. His success is due to same causes that make the big factory superior to the small workshop.

By concentrating his attention on chronic and difficult cases, he can devote his whole time, learning and research, to that special line, while his time is not taken up with the easy cases of common ailments. A large firm of specialists, like Babington & Thomas of Detroit, treat more chronic and obscure cases in a month than even the largest general practitioner would in a year. It is largely due to the specialists that chronic, nervous, blood, skin and catarrhal diseases show such a great increase of cures.

Card of Thanks.

Mr. and Mrs. Will Irish wish to express their appreciation to those who responded so promptly to the alarm of fire on Monday morning at their home.

Cook & Co. are now doing a general line of repairing.
