How Much Service Can You Get From Your Typewriter?

It's what a machine *does*, not what it *costs*, that is most important.

All typewriters *do not* have the same efficiency and the same operator *does not* get the same result on every writing machine.

The L. C. SMITH & BROS. Typewriter

will produce ten to twenty per cent. more work than any other typewriter ever made.

How is this possible?
Here are a few reasons:

1. It is ball-bearing throughout—others are not.
2. All operations are controlled from the keyboard.
3. It is the lightest touch machine made.
4. It does not "smut" the carbon.
5. The ribbon reverses automatically.
6. The type is so protected that it is not battered by collision.
7. One motion of the hand returns the carriage and operates the line space.
8. It has an inbuilt biller and tabulator.
9. No trouble to write on paper as small as a postage stamp.
10. It is built for service.
