A dancing party will be given at the Grace House on Friday evening, January 8th, when the usual good time will prevail. Stone's orchestra will furnish the music, and a special car for Detroit at one o'clock.

A splendid Christmas entertainment was given at the Clarenceville schoolhouse Tuesday evening of last week by the teacher, Miss Lila Peak, and her pupils. An excellent program was carried out, and a beautifully trimmed Christmas tree loaded with presents added much to the evening's enjoyment.

A wagon on wheels is becoming more the exception than the rule, since the heavy snow fall of a couple of weeks ago, and wagons as well as light rigs are getting around on runners, and the sound of sleigh bells may be heard at all hours, day or night. The "kids" are also taking advantage of their opportunity, and hooking rides has become a favorite pastime.

Last week's issue of the Enterprise was issued Wednesday evening, we believing at the time that no mail would go out on the Rural Routes Christmas morning. It would not have been necessary, as the carriers went out just the same as usual. If the carriers are entitled to a holiday on New Years Day and several other holidays, Christmas should certainly not be excluded, as we'll venture to assert that they would enjoy a holiday on December 25th, more than on any other day in the year.

While backing from the depot in Farmington on Christmas morning the line car crew forgot to change their trolley to the other cable with the result that a pole in front of the Cook store was stepped off, about six or eight feet from the ground. The remaining stub was unearthed Monday and a new pole installed by the crew, but not without accident, as a window in the F. L. Cook store was broken when the iron handle on the jack snapped and plowed into the window.

Ten couples of young folks enjoyed an old fashioned sleigh ride, driving to Northville, and returning via Novi, Monday evening. The party stopped at Northville long enough to enjoy an oyster supper.

Every typewriter strikes the printing center every time.

The L. C. Smith & Bros. Ball-bearing, Long-writing Typewriter

How Much Service Can You Get From Your Typewriter?

It's what a machine *does*, not what it *costs*, that is most important.

All typewriters do *not* have the same efficiency and the same operator does *not* get the same result on every writing machine.

The L. C. SMITH & BROS. Typewriter

will produce ten to twenty per cent. more work than any other typewriter ever made.

How is this possible?

Here are a few reasons:

1. It is ball-bearing throughout—others are not.
2. All operations are controlled from the keyboard.
3. It is the lightest touch machine made.
4. It does not "smut" the carbon!
5. The ribbon reverses automatically.
6. The type is so protected that it is not battered by collision.
7. One motion of the hand returns the carriage and operates the line space.
8. It has an inbuilt biller and tabulator.
9. No trouble to write on paper as small as a postage stamp.
10. It is built for service.

Send for illustrated catalogue.
