### ECONOMY

Economy in fuel consumption—Economy in tire mileage—Economy in

upkeep—and greatest of all, Economy in the long run because of the everlasting quality. Buick cars are every day establishing remarkable fuel economy records. It was a Buick that won the Wisconsin Reliability and Economy contest with an average of 24.8 miles to the gallon for over 500 miles.

For examples of Buick longevity and uninterrupted service, look to the various models, from the first one built. They're still in service, some of them in our home town.

The club will meet with Mrs. Martha Warner for a special day February 3.

## How Much Service Can You Get From Your Typewriter?

It's what a machine does, not what it costs, that is most important. All typewriters do not have the same efficiency and the same operator does not get the same result on every writing machine.

### The L. C. SMITH & BROS. Typewriter

will produce ten to twenty per cent. more work than any other typewriter ever made.

How is this possible?

Here are a few reasons:

1. It is ball-bearing throughout—others are not.
2. All operations are controlled from the keyboard.
3. It is the lightest touch machine made.
4. It does not "smut" the carbon.
5. The ribbon reverses automatically.
6. The type is so protected that it is not battered by collision.
7. One motion of the hand returns the carriage and operates the line space.
8. It has an inbuilt biller and tabulator.
9. No trouble to write on paper as small as a postage stamp.
10. It is built for service.
