GIRLS' AND BOYS' MENTALITY

Female Begins Early to Develop It, Scientists Say, But She Stops Before the Boy.

"It may be taken as an accepted fact," writes a German scientist, "that the average age of speech-development is several months earlier in the girl than in the boy. While it is not very rare to find a year-and-a-half-old boy still unable to talk, the development of speech has made considerable progress in girls of this age, and in certain later periods of life her further advancement is even more obvious.

"At fifteen the male is generally only a big boy, while the girl is often quite a finished young girl. But her mental development not only begins earlier, but stops earlier. It is probably not to be doubted that in the young woman of twenty-five all the powers of the intellect which are capable of developing are at least indicated and formed and generally at ready quite well established. The twenty-five-year-old youth, on the other hand, is still full of unexpressed possibilities for the future. The exceptions that occur do not vitiate the average law that the comparative cycle of development is relatively smaller in the girl. In women the conservative tendencies natural to their sex are most marked; in men, the progressive tendencies."

THE PROVISIONS.

"Smith's wife doesn't mince matters," "I guess he wouldn't care if she did, as long as the particular matter was pie."

SHE KNEW FROM FATHER.

"Ma, what's discretion?" "Discretion is the better part of valor."

Marks of Sincerity

THE more you know about the way this car is built, the more you will be impressed with its value. As a few examples of our way of doing things, we cite to your attention the fact that all wiring is housed in waterproof, rustless, flexible conduits—junction boxes between the body and the chassis—the pressed steel housing for the speedometer driving gears—the three-piece steel body—the deep section frame—the suspension of the springs beneath the frame, so that there is no overhang—the ball-and-socket joint by which the rear spring is attached to the rear axle—the mounting of the headlights on the front fender apron, so as to make easy adjustment and focus. And so we might go from "stem to stern," pointing out superlatives not generally found in cars of this price. But when it is all boiled down to its simplest terms, you will find the performance of this car the source not only of economy, but of great pleasure on its one-thousand-mile run. It might well be called "The 100,000 Mile Car." That's the test. Proofs, not promises. May we send you our catalog, which illustrates many of these interesting features?

H. W. LEE & SONS

Taken With Croup

"A few nights ago one of my patrons had a child taken with croup," writes M. T. Davis, merchant, Bearsville, W. Va. "About midnight he came to my store and bought a bottle of Foley's Honey and Tar Compound. Before morning the child was entirely recovered." Many such letters have been written. For sale by T. H. McGee.

Read the liner column.

For Croup--Mothers-- Always Keep This Handy

The day of the Croup scare is over for those parents who wisely keep Foley's Honey and Tar Compound in the home ready for instant use. Mrs. Clara Raitz, Allen's Mills, Pa., writes: "I have used Foley's Honey and Tar Compound for the past eleven years and would not be without it. It has saved me many a doctor's bill for colds and croup."

If toward nightfall the little ones grow hoarse and croup, if their breathing becomes wheezy and stuffy, give them Foley's Honey and Tar Compound at once. It will ease the little sufferers quickly, cut the thick choking phlegm, and soon they will have easy breathing and peaceful quiet sleep.
